MATCH DAY

Match Day is no ordinary soccer game. Blistering 3-D action, total animation and automatic camera scan are just some of the intricate techniques which make Match Day the league

leader of soccer games. Now follow the "Action"

Your striker traps the ball from a perfectly placed corner-kick, takes on the defender and dribbles neatly round him making space to

his powerful half-volley rattles the cross-bar, the ball returns, floating menacingly above the penalty

area and your star striker seizes this half-chance

to head the ball decisively into the back of the net... GOAL!

chip in a teasing cross-ball to his advancing team mate in the

six-yard box. There is no time to control the ball, your player must commit himself to a snap shot on goal...

Match Day is as compelling as soccer itself. You will marvel at the depth of play and ball control offered only in MATCH DAY... Shoot to win!

GETTING TO GRIPS WITH THE BUGS

Dear Sir,
That fantastic game called *Dive Bomb* in August's issue was excellent apart from a few bugs. But I think I managed to sort out something about it. The bugs were in lines 720, 1360.

In line 720, to make things easier, write: 720 IF K=32 THEN 800. That means you can now use the space bar to drop the bombs. And in line 1360 it should read: 1360 X=Q and not X=G as was printed.

If you add the following line, the sound will work: 1445 RESTORE 1480.
Roy Robinson
Canterbury
Kent

RETURN TO SENDER? ADDRESS UNKNOWN!

Dear Sir,
I recently purchased two games from a company calling themselves Euro Byte. The games were titled *Chain Reaction* and *Games Designer*. The company came unaddressed, most likely because the software which they produce is such scrap that it probably embarrasses them to admit to ever knowing about it. I purchased the games at a stand at a radio show.

Needless to say, I couldn't return them because the stand at which I bought them also came unheaded. The price label on the front of the cassette said £7.95 but the men selling them said they were at a reduced price of £4.00.

I would like to warn everyone of my experience. The *Games Designer* was just a sprite designer and a very poor quality one at that and

Chain Reaction was like a very bad example of a magazine program. The controls hardly even worked on either of them. So I would like to warn everyone — don't buy Euro Byte Software at any price.
Mark Wylie
Renfrewshire
Scotland

SCROLLING ALONG ON THE BEEB

Dear Sir,
Could you please help me to solve a problem of mine? How is it possible to scroll the screen in mode 2 on any BBC B from a given length on the horizontal axis going right to left? Oh, yes could you tell me the easiest way to disable the control/break effect?

Darren Virgin
Whickham
Newcastle upon Tyne
Editor's reply: Buy the book *Acornsoft called Creative Graphics*. Look in the VDU + *FX commands section of your user manual for the break/disable command.

A SADE GROUPIE WRITES IN!

Dear Sir,
Richard, who is interested in the Thompson Twins? I just want to see SADE!!
Thomas W Caster
Darmstadt
W Germany

Editor's reply: Don't we all Thomas! Anyone else with a favourite computer related pop group/star they'd like to see?

MORE ANTICS WITH ANT ATTACK

Dear Sir,
In response to Christopher Hester (C&VG Sept), I can score 49,877 on *Ant Attack*

and also agree with him about how easy *Ant Attack* is. I can literally glide through the city and know its buildings and positions in the city off by heart.

Another tip for adventurers, although a bit useless. There is a network of passages inside the squares that seem to serve no purpose in life. These passages can be accessed by standing on the girl, who in turn, must be standing on an ant. The entrance is the square hole in the wall round the back, opposite the crypt.

Another fact — the crash on *Pac-Man* that prints half a maze and a full character set happens after the 256th screen due to the fact that *Pac-Man* has only an 8-bit CPU.

Andrew Myles
Stirling
Scotland

INTRODUCING — TOP OF THE SHOPS!

Dear Sir,
Last time the heading was *Top of the Flops*, but a balance should always be maintained so I would like to express my sincere thanks to Audiogenic, of Reading, for their prompt service, since in my opinion it does positively put them top of my *Top of the Shops* list.

After posting an unsigned cheque (yep, I'm getting forgetful in my old age), Audiogenic's superb staff not only returned the cheque for signature, but once it was delivered to them a second time they then despatched the goods so promptly that they were handed to me, by our postman, within ten days of the original posting. Sure this must rate as a record for customer relations?
E Le Marquand
Channel Islands

GO TO WORK ON THAT EGG!

Dear Sir,
Upon hearing that Scott Adams' *Adventure* were to become available for the Spectrum, I waited avidly for them to arrive on the shelves of our local stores. Having played Scott's games before on various friends' computers, I was very eager to play some on my own micro.

However, after shelling out the sum total of my elfin gold, I must say I was not impressed with Scott's latest effort, *The Hulk*.

Although graphics are fair, I must say in all honesty I've seen much better. The graphics 'off' switch fails to work either on its own or in combo with any others.

The game is badly mapped. Going north from the field sometimes puts you in a room with an egg and a jewel. At this point you are allowed one turn before the eggs blows up. If you are not the Hulk when this happens, you are dead. If you are the Hulk, the egg blows up taking the jewel with it. Also there is no apparent means of escape until poison gas gets into the room and kills you. Believe it or not, you must type quit to start again if you are dead.

Also, the game doesn't always recognise words which have been used before. On one occasion I had to type in 'bite lip' five times before it was recognised.

When comparing it to games such as *Pyramid of Doom*, *Ghost Town*, *Savage Island*, *Voodoo Castle* etc, it just does not rate.

My final comment is that if I had known then what I know now, nobody

would have been able to pay me enough to take the Hulk off their hands!
D G Hodgson
Putney
London

Keith Campbell replies: You seem to be describing two separate problems, Mr Hodgson. If the graphics OFF switch fails to work and your correctly typed commands are intermittently unrecognised, then it would appear that you have a faulty tape and you should return the original to the supplier, asking for a replacement.

But it is no good complaining about the egg blowing up (whether or not you are Hulk).

An Adventure game is a series of puzzles and the whole point of playing an Adventure is to solve it! This is obviously one that you must bend your mind to a little harder — perhaps around breakfast time you might see things a little more clearly!

SETTING THE RECORD STRAIGHT

Dear Sir,
I write concerning a program listing published in the July edition of C&VG entitled "En Avant" for the Atari.

The program was wrongly credited in your magazine, as it was written by me.

I have already written on this subject and made three telephone calls to your office, but to date no correction has been printed.

Malcolm Booth
Rotherham
South Yorkshire

Editor's reply: Sorry Malcolm. But Atari owners everywhere liked your game!

FIDDLING WITH FORMATS

Dear Sir,
After reading Tony Dolman's letter (C&VG June), one of my friends made up a difficult *Space Invaders* program. In this game, when you reach 500 points, you get a bonus man. He then saved it using Tony's special format. However, when another friend played the game, he easily got 500 points, only to be prompted by an error report, incorrectable because of the run-only format.

If this has happened to anyone else, you might be interested to know about my format. The program automatically runs, but you can break/system reset into the program to modify it or correct any errors. Here's how:

When saving type: SAVE "C:\filename" and press return. Continue normally. When loading, type RUN "C:\filename" and press return. Continue normally. N.B. Will not work on a disc drive.
Karl Fitzhugh
Rectory Farm
Northampton

PIRACY KILLS SOFTWARE — 1

Dear Sir,
I was reading the micro ads in your June edition. While reading these ads, I saw an ad saying it was illegal to duplicate or sell copyrighted software. Well, if this is true, my friend and I would like to inform you we have over \$4,000 worth of illegal software which I am pleased to say I'm quite proud of.

The reason for pirating these games is the fact that games are too dear these days. Therefore we wait for someone to buy a game

and then copy it for ourselves. After this, we sell more copies to other kids for cheaper prices and the kids that buy the games get a good deal!

So your ads are completely wrong as it is legal to sell and copy any software available to us. All you kids over there with CBM 64s wake up and start your own pirate club like ours as you save a hell of a lot of money.

Andy McTaggart
New South Wales
Australia

Editor's reply: I'm not sure about the price of games in Australia, Andy, but what I do know is that piracy kills software companies. How would you feel if you'd spent over a year programming a game, paying for duplication, cassettes, advertising and packaging only to find you couldn't even break even because people were ripping off your game? By ripping off games, you could be putting out of business the people who bring you the games. One day you could wake up to find all the independent software houses out of business and no games left.

PIRACY KILLS SOFTWARE — 2

Dear Sir,
I am writing in response to the article in your June edition on software piracy. I have noticed that in the April edition of *Your Computer* a back-up copier for the Spectrum was printed in its listing section. Surely if software piracy is to be stopped, a tighter measure should be taken to stop things like this happening.

James Ledwith
Wigan
Lancs.

STUCK UP A BEANSTALK!

Dear Sir,
I have recently bought *Jack and the Beanstalk* from Thor for my Spectrum. After much frustration, anger and fistbanging I eventually conquered the first screen. The problem is that I can find no way of climbing the bricks on screen 2 and so I am stuck on this level. Not forever I hope!

Jonathan Funnell
Trowbridge
Wiltshire

Editor's reply: Well, can anyone help Jonathan with the giant?

FREE GAMES — FREE FOR ALL?

Dear Sir,
I am writing in protest of your system giving away free games. This is indeed a good idea, but I find its implementation leaves a lot to be desired. In particular I would like to point out that this system of giving away free games to the first x number of entries is biased.

I for one live in the North West of England. Therefore, my entries to such a competition do not have the same chance of winning as, say, an entry from London. A recent example is that of your *Star Bike* competition.

Garry Tan
Bury
Lancs.

Editor's reply: Thank you for your comments, Garry, but we stopped this system of giving out free prizes several months ago. All our competitions are open for one month to everyone. At the end of the month, the entries are jumbled up and the winners picked at random.

PRESENT A NUMBER 1

SMASH HIT!

PRESS RELEASE

Mutant Monty

This puzzle proves to be positively perplexing and perpetually pleasing to posers, presenting persistantly provoking problems; providing profuse pleasure and producing a palliative or placid panacea to people possessing a propensity for persistence, patience, perspicacity and painstaking propensities.

A pleasurable pantomime with Monty participating in a penetrable panoply of puzzles, parading particularly pleasurable patterns panning paramilitary paraphernalia, performing pulsating perilous peptic projectiles in perfunctory profusion.

A palpitating parable packaging a peculiar parody with piercing passion not paralleled in any perimeter. Karl Jeffery has painstakingly produced this pandemonium of pleasurable phenomena price £6.95, poised purposely for CBM 64 and Spectrum 48K.

A plethora of 40 polemic screens, pneumatic prismatic power, periphrasis - the perfect performance.

Phew !

LEGEND OF THE KNUCKER HOLE

English Software's new game is based on a real legend. The Knucker Hole actually exists in a place called Lyminster in Sussex. The legend has it that a dragon lived in the hole and nipped out from time to time to ravage the countryside. The King of Sussex offered the hand of his daughter in marriage to the man who could kill the dragon. A wandering knight came along, took up the challenge and killed the beast. He married the King's daughter, settled down in Lyminster and his grave-stone can be found inside the local church. The word Knucker is an English version of the Icelandic word *nykur* which means water-horse or dragon. So now you know!

Once upon a time, long ago — or could it be happening right now in a different dimension, who knows? Anyhow stop checking your timepieces, the only thing that really matters is that a dragon is terrorising a once peaceful kingdom and the ruler of the kingdom has done the traditionally accepted thing and offered this daughter's hand in marriage to the person who can rid his kingdom of the dragon who hides out in a place called the Knucker Hole — a mysterious cavern.

News has reached our hi-tech hero Jet Boot Jack, the man with those super Jet Boots, and he has decided to take up the challenge.

Jack has approached his friendly local neighbourhood wizard who has agreed to give him a hand if he can retrieve the Six Bells of the Holy Tower hidden in the Knucker Hole.

In return, the wizard will supply Jack with some special Dragon poison and a brand new pair of Jet Boots to help him in his quest.

Now, this is where YOU come in! English Software has given us 50 copies of this latest arcade adventure game featuring Jet Boot Jack. You could soon be the envy of your friends if you enter our exclusive Legend of the Knucker Hole competition.

All you have to do is answer the three simple questions below, fill in the coupon and mail it to *Computer & Video Games, Legend Competition*, Priory Court, 30-32 Farringdon Lane, London EC1R 3AU. Normal C&VG competition rules apply and the editor's decision is final.

THE QUESTIONS

- 1 There's a very famous bell in America called The Liberty Bell — there's something very wrong with it. What?
- 2 What is the name of the nasty dragon featured in *The Hobbit*?
- 3 People who enjoy bell-ringing are called: a) Philatelists? b) Taxidermists? c) Campanologists?

THE GAME

If you remember Jet Boot Jack's first game, from English Software, written first for the Atari but now going down a storm on the Commodore 64, BBC and Electron too, then you'll know that you can expect plenty of action in the sequel, *The Legend of the Knucker Hole*.

It's a big game with multiple-screen play. There are both horizontal and vertical maze-like screens or "zones" full of traps, hazards, dead ends, elevators — and we mustn't forget the Kangarats!

Legend of the Knucker Hole has so many features that we could spend a page describing them — but it's much more fun discovering them for yourself.

The player can also decide which "zones" of the game he or she wishes to play — but this is recommended only when you've really got into the game! You can even extend the Kangarat Kavern into a 16-screen game within a game should you so wish.

There's a high score table too and a really nice "reward sequence" if you manage to finish off the Dragon and rescue all the Bells.

Commodore 64 owners won't want to miss out on this game or our exclusive competition!

THE OFFICIAL
Eddie Kidd
JUMP CHALLENGE

If you've ever wondered how it feels to be Eddie Kidd... defying danger and gravity, soaring on a motor-bike over a long line of cars... here's your chance to find out!

This fabulous new game - Jump Challenge - has been produced for you by Martech, with a lot of help from Eddie himself.

At the age of 12, Eddie Kidd was jumping over oil barrels on a bicycle. At 18, he shattered the world record with his astounding leap of 190 feet - clearing 14 double-decker buses. Can you match his skill, courage, control and ice-cool nerve? Jump Challenge will show how you compare with the King of Motor-Cycle Stunts!

Just like Eddie, you'll start by trying to clear barrels on a bicycle... gradually working up to attempting Eddie's daring leaps which have thrilled millions around the world!

- ☐ 100% machine code
- ☐ separate control of bike and rider for incredible realism
- ☐ dangerous headwinds for added difficulty
- ☐ scoring system - for successful jumps
 - ☐ joystick or keyboard option
 - ☐ PLUS!!! You can enter the Official International Jump Challenge Competition!

JET SET!

"So what's a game as old as Jet Pac doing in my hot-off-the-press and up-to-the-minute copy of C&VG?" I hear you ask.

In case you've forgotten, Jet Pac was the game which launched Ultimate on its way to stardom, being the company's first release for the Spectrum a couple of short years ago. So why mention it again.

"Well, take another look at that photo. Are you quite sure that's a Spectrum? Actually, someone's written the game for the Commodore 64. It's almost exactly the same as the Spectrum version, though Jetman has a little more colour. The aliens are still there and, although they have more colour than on the Spectrum, they do move a little more jerkily.

The idea is to build your space rocket and explore the different planets. Then, collect enough fuel to fill the ship and take off for your next mission. So where did we get it? And who wrote it? Well that would be telling, wouldn't it.

FIGHTER PILOT

Digital Integration's best selling and highly acclaimed Spectrum flight simulation program has now been converted for the Commodore 64 computer.

All the features that made Fighter Pilot such a chart success have been included plus exhilarating new sound effects for even greater realism.

With real cockpit view and highly realistic 3D air-to-air combat, Fighter has become a yardstick for flight simulations on the Spectrum.

The game is available from Digital Integration in mid-November and will cost £9.95 and £14.95 on disc.

DOWN THOSE MEAN STREETS

KUMA

True to style, Kuma have been quick off the mark with their latest releases for MSX and Amstrad machines, all at competitive prices around the £5.95 mark.

Of their 30-odd MSX programs, 15 are games. The latest are *Star Avenger* (already available for the Sharp 700 and Amstrad), *Stop the Express*, *Niga* and *Mean Streets*.

The latter involves the hassle of trying to get to work, and the kind of characters you encounter on the way, including a glue sniffer, a Tory politician, a Liberal candidate and a social worker.

Other MSX games include *Driller Tanks*, *Binary Land*, *Fire Rescue*, *Eric and the Floaters*, *Dog Fighter*, *Hyper Viper*, *Coco in the Castle*, and *Cribbage* — a card game. There is also a non-violent simulation game called *Hold Fast*. "To make people think, instead of just shooting," says Day. For chess fans, *Superchess* is available for £8.95.

The company will wait and see how distribution goes for MSX disk drives before putting these games onto disk, and even if it goes well, Kuma won't do this before the New Year.

UNDERWEAR OR SOFTWARE?

Instead of seeing piles of jumpers or mountains of knickers the next time your mother drags you round Marks and Spencers on a big pre-Christmas shopping expedition you may well catch a glimpse of M&S's new range of computer games.

All the games have been written for the 48K Spectrum. The three titles are *Start to Program*, *Games Pack* and *Games Maker*.

Start to Program, as the name suggests, is an introduction to the art of computer programming. The program gives a step by step course explaining each separate concept. Keyword and programming technique needed to make full use of the Spectrum's potential.

The Games Maker is a sophisticated game which allows you to design your own games software without having any prior knowledge of machine code or even Basic programming.

The last package, *The Games Pack*, is the usual collection of old hat games that turn up regularly in this type of collection.

The games will only be available from a few "test stores" for the time being but in the New Year M&S are hoping to extend their software to other stores around the country.

Meanwhile, they have released five games for the Amstrad, namely *Fruity Frank* and *Star Avenger* both at £6.95, *Hold Fast* and *Galaxia*, both at 5.95 and *Gems of Stradus* at £7.95.

Fruity Frank is an unfortunate creature who is trying to pickle his fruit in peace, but keeps being attacked in the supposed privacy of his own garden by strawberry monsters and attacker plums.

In addition, Kuma has released a

simulation game for the Commodore 64 called *Stock Market* based on the London Stock Exchange. It's available now for £6.95.

Lastly, Amstrad owners may be glad of a book to help them along. "The Amstrad Explored" by John Braga is published by Kuma at £7.95 and covers animation, graphics, music, use of assembly code, character sets and sample programs.

TAKE OFF WITH THE 64!

G·A·M·E·S N·E·W·S

THREAT TO THE PRICE WAR?

The present price war raging in the low price end of the software market may be turned on its head by a new games rental scheme.

Wildest Dreams, a newly formed Coventry software house, are to produce ten new games for the Spectrum and Commodore 64, but for rental only. The range includes *Bats and Circus* for the Commodore and *Castle Quest*, *Warp Factor 6* and *Laser Bike* for the 48k Spectrum. The games have been acquired by Wildest Dreams from PSS.

The programs will be available from most software dealers and video rental shops. Rental charges haven't been fixed but should work out to be around 50p a night.

A spokesman for Wildest Dreams said: "We are hoping that these games will produce a clear-out in the low price software market". He added: "Our product is far superior and will precipitate a rethink in budget priced games."

Wildest Dreams are hoping that other software houses will participate in the rental scheme in the New Year. For further details contact Wildest Dreams on (0293) 663885.

Chiller, Mastertronic's best selling game, is the centre of a storm surrounding the backing music used in the program.

Rocksoft, a company set up to protect music publishers and their copyrights, tried to force Mastertronic to withdraw the game because the backing music bore a remarkable resemblance to Michael Jackson's best selling single *'Thriller'*.

Rocksoft issued a statement to the computer press which said that Mastertronic had withdrawn *Chiller*.

Mastertronic firmly denied this claim and their chairman, Frank Herman, said: "It has been brought to our attention that the computer sounds produced in this program are similar to the music copyrighted by Rondor Music called *'Thriller'*. Therefore we have agreed to negotiate a royalty in respect of this, and to use different music in future production runs."

WATCH OUT FOR THE CADCAM WARRIOR

Amstrad owners will have six more games to choose from thanks to Taskset, the software company based in the depths of Bridlington, Yorkshire.

The games include *Super Pipeline*, *Poster Paster*, and *Jammin'*, the latter being quite essential if you're into reggae. You may recognise these titles as having been available on the Commodore 64 before now — they did so well that Taskset decided Amstrad owners should get a chance to play them too. The games all sell for £6.90.

However, Commodore 64 owners haven't been forgotten. *CADCAM Warrior* came out in time for Christmas, an unusual and complicated game based around a Computer Aided Design (CAD) exhibition. This one is more expensive at £9.95 for the tape version (£12.95 for the disk) but promises not to bore you to death.

The instructions come in French and German as well as English, so those of you brushing up on your languages may find this useful.

Taskset are best known for their Commodore 64 games. Their eighth for this machine is *Super Pipeline II*, due for release this month.

DESIGNER OF THE MONTH

NAME: Derek Brewster

BORN: Durham, 1958

GAMES: Jasper, Code Name MAT, Kentilla and Pac-Man

Derek Brewster's programming career started on a computer that's a million miles away from his present machine — the Spectrum.

He first encountered a computer while studying geo-physics at University. The first game he ever played was called *The Colossal Adventure* which ran on the University's huge mainframe computer.

During his three years at college he wrote an adventure game of his own on the mainframe, which he admits wasn't earth shatteringly brilliant. However, Derek bought a Spectrum as soon as it was released and began writing in machine code.

When I asked him how long it took him to learn machine he replied that it took him only one day, but he added: "Machine code is very easy to learn. But you never stop learning".

Derek has worked for several companies during the past few years, including Quicksilver, but is happily settled at Micromega. And with a string of hit games behind him he looks set for even more success in the future.

Favourite Food: Pizza.
Favourite Drink: Bitter.

Favourite TV Programme: I'm not sure. I don't watch much television but I suppose it must be *Star Trek*.

Favourite Computer Game: *Lords of Midnight* from Beyond Software.

Pets: A tank of tropical fish.

Countries Visited: France, Monaco, Yugoslavia, Denmark and Greece. Paris is easily my favourite city.

The thing about computing that makes me want to throw up: All the hype that has preceded the launch of the Japanese MSX computers.

Ever wanted to know all about your favourite programmer? Then why not let us know which programmer you'd like to see profiled in this spot?

G·A·M·E·S N·E·W·S

AVALON'S NEW LORE LORD!

Well, we shouldn't have opened our big mouths so soon should we? In our review of *Avalon* we said that it would take ages for someone to solve it. We were wrong — who said not for the first time? The person who defeated *Avalon* is Chris Hoare from Ventnor on the Isle of Wight.

The people behind the myth of Maroc the wizard and his quest, Hewson Consultants, have organised a presentation for Chris at their Abingdon HQ — and we'll be bringing you more news of the new Supreme Lore Lord next issue. In the meantime the rest of you have some catching up to do!

PHONE THE MICRO-LINE

The country's first phone-in computer information service has been set up in Bradford to provide a weekly update on all the news that has happened in the micro computer world.

Computer owners who dial Bradford 722622 will hear a three minute recorded message detailing all the latest news on new hardware, software and all developments in the industry.

The contents will initially be about what's new in the computer world, new concepts and new ideas as well as the nitty gritty of hardware and software.

The contents of the message are to be updated at least twice weekly.

The message is aimed at the rapidly expanding home computer market and is supplied by "Information Unlimited".

CONAN THE DESTROYER

Conan the Barbarian, the fearsome warrior recently brought to life in the film *Conan the Destroyer*, is to be the central character of a new American adventure game.

Conan was created in a series of books written by Robert E. Howard and has featured in hundreds of other books, comics and two full length feature films. So it's no surprise that Datasoft have bought the rights to use the character in a forthcoming game.

The game is a multi-screen graphical adventure, similar to Bruce Lee, in which you must guide Conan through ancient castle chambers slaying vicious glowing flame monsters, fierce dragons and a whole army of demonic creatures. The player must use the power and swiftness of a sword to defend himself against the horrors if Conan is to succeed in his quest for wealth and glory.

Following along the film to computer game theme, US Gold are also importing an arcade game called *Indiana Jones and the Lost Kingdom* written in the States by Mindscape Software.

The game contains six screens of enthralling action based on the two films, *Raiders of the Lost Ark* and *Indiana Jones*.

The game comes with the least of instructions and hints. You are given the loading instructions

and a brief introduction to your character and a description of the objective of your mission.

Geoff Brown of Centresoft said of the game. "The graphics are incredible. Indiana Jones is one of the best American titles".

US Gold are also launching a whole new range of software in the New Year called *All American Adventures*. The company have decided to concentrate less on arcade style games and try to import some of US's most popular and challenging adventures.

The company who will be spearheading this assault on British adventurers is Infocom. Already famous in this country for games like the *Zork Trilogy*, *Infidel* and *Stranded*, their new series of games, includes *The Hitch-Hiker's Guide to the Galaxy*. All the games will be repackaged and repriced at around the £10 mark.

Due to the high complexity and length of some of the programs, many of the games will only be available to Commodore owners on floppy disc.

HERE TO STAY

TEXAS INSTRUMENTS TI-99/4A

1 THE SOFTWARE IS HERE

PARCO ELECTRICS have more software for the TI-99/4A than anyone else in Europe. Watch out for new titles from the USA, as well as our own range of quality cassettes.

R·E·V·I·E·W·S

GH·ST·B·U·S·T·E·R·S
BY DAVID CRANE
COMMODORE 64

GHOSTBUSTERS

MACHINE: CBM 64
SUPPLIER: Activision
PRICE: £10.99 (cass.)
£19.99 (disc)

BUG HUNTER
WARNING

Reading this review may seriously affect your enjoyment of the film!

Ghostbusters on the 64 closely follows the plot of the film which has just been released in this country.

The game was written by David Crane, the brains behind *Pitfall* and *Demolition*, two of Activision's other hits.

And I guarantee that *Ghostbusters* the game will be as popular as the film. It's the best I've ever played on a micro. The graphics are superb and the sound, well, the sound is better than anything you've ever heard from a micro. Everyone knows that the 64 has a built-in synthesiser chip, but Activision seems to have mastered its use better than anyone else.

As a *Ghostbuster*, your task is to rid the city of its paranormal occurrences and to keep the psychokinetic energy as low as possible, ensuring that the ghosts won't return.

As the game starts, the *Ghostbusters* logo appears on screen and the computer plays the theme tune. All the way through! And just to make it easier for you to sing along, the words appear on the screen and a bouncing dot guides you through them. Then, when it's time to shout "GHOSTBUSTERS!", just press the space bar and the 64 does it for you. The quality of the speech is very good, even though it works without a speech synthesiser.

Now you have to try setting up a ghostbusting business. The bank will loan you \$10,000 with which you can buy your car, ghost traps, marshmallow bait and everything else that the modern ghostbuster can't be without.

In the screen: The Marshmallow Man Comes To Town! Bottom left: A ghost disappearing into the trap. Top right: Even driving along you can swallow up ghosts! Bottom right: Loading up your car with equipment

The more you pay for your car, the faster it will move and the more equipment it can carry.

Once you're all set, you move to a plan of the city. This shows the temple of Zuul and the other buildings. If one flashes red, it's haunted and your services are required. Move the cursor to the building, press the button and you're off! The screen changes to a road race type layout, with a view of the road and your car.

When you reach the scene, you have to lay your trap and activate the negative ionizer backpack, remembering, of course, not to cross the

streams.

If you manage to trap the ghost, you get paid and the money is added to your balance. If you don't, you lose a life.

Occasionally, on the city map, a Marshmallow Alert warning will sound and a large Mr Stay Puft man will appear. If you fail to trap him with your ghost bait, then the damage he does by trampling on buildings will be deducted from your balance.

Your final aim is to get enough money to be given an account. Then, you won't need to borrow from the bank at the start of a game. You just put in your account

number and the game will recognise you. And this will work on any copy of the game, so if you go round to a friend's house you can use your own account number.

This game is terrific. I saw the film at a preview last month and the game brings it all back to me. You may be confused by everything going on in the game if you haven't seen the film. So my advice is

see the film and buy the game. You won't regret it.

- Sound 10
- Value 9
- Playability 9

R·E·V·I·E·W·S

The new Spectrum Plus is fully compatible with all 48k Spectrum Software. All Spectrum games reviewed in C&VG will run on the Spectrum Plus.

2 CLIFF HANGER

MACHINE: CBM 64
SUPPLIER: New Generation
PRICE: £7.95

It's Christmas and the silly season is with us again. This latest release from those masters of computer graphics is set on various mountain passes.

In front of you the road snakes away into the distance, where lurks a sneaky bandit. Sometimes you'll be able to see him coming towards you but, when there's a twist in the road, you'll have to work out his position from the sound of his footsteps and the crack of his revolver.

You are perched on a cliff and are equipped with various contraptions to catch El Bandido unawares as he rounds the corner. The Faraday screen is all about magnets. Pick it up and it will attract a large anvil on the opposite cliff, falling to the ground below. Getting your own back is all about boomerangs. When the bandit rounds the corner, throw the boomerang at him. If you're lucky, it'll hit him. If not, it does a superb spin and returns to your hand.

Like many games at the moment, there are parodied versions of other classics in here as well. Chuckie Bomb has you throwing bombs at the enemy while Boulder Dash involves rolling large rocks down the cliff.

If you manage to hit the sharp shooter, your character does a cute little dance on the screen. If you don't, he'll either scratch his head or knock himself into the ground by hitting his head with a mallet!

The music is some of the best I've heard on the 64 — very Italian-like with lots of twiddly bits.

The game works with joystick or keyboard. My only complaint is that there's not much for the player to do except position himself on the cliff and press the button.

But there are lots of screens and this will certainly liven up your Christmas party. As long as someone's remembered to buy you a 64, that is.

3 STARBIKE

MACHINE: Spectrum 48k
SUPPLIER: The Edge
PRICE: £6.95

An Orola, in case you didn't know, is a bouncing yellow blob which knows what it's doing and where it's going.

It's also pretty fed up, as some mean race called the Mordra has just blown its planet to smithereens.

Luckily, though, they just happened to have these escape pods at hand and some Orola managed to get away.

An escape pod seats five and, for reasons known only to the Orola, they sent one escape pod to each of a galaxy of planets.

Your task is to tour those planets, returning the Orola to their teleporators which they have set up.

Each time you do this, you

are moved on to the next sector to look for another Orola. Problem is that if, after getting the last one, you are at the wrong side of the planet, you have to fight your way back again across the galaxy before you can take off.

That's the general idea of the game which took me some time to puzzle out. The instructions are written in the form of a memo from the Commander to you and there's a lot to remember.

Once the game has loaded, you can select the controls. You can use a Kempston, Fuller or Protek interface or the keyboard.

The first thing I noticed was

the similarity to Jet Pac. Sound effects are similar and so is the man on his starbike, even the aliens move in the same way. The difference is that the screen scrolls sideways as opposed to being set on a single screen.

It's colourful and fast, but if you've already bought Jet Pac, you may be disappointed.

FOOTBALL MANAGER

MACHINE: Amstrad
SUPPLIER: Addictive Games
PRICE: £7.95

Budding Bobby Robson should have no problems with this game at level 1, but on level 7 it'll probably defeat even the great man himself.

Originally in text-only form on a ZX81, the Spectrum version had the added attraction of 3D graphics used for the match highlights. These are still here in the Amstrad version, and better than before.

First, though, you have to pick your team. Then, once you've chosen which side you wish to lead to victory, you can examine your team list. You will start with 11 players, although some may not be deemed fit by the computer to be able to play the next match. This means that you'll have to open the old purse and buy someone. Don't bid too high or you'll waste your money.

Once you have a team, you can play a match. Sometimes you'll simply be given the final score, while on others you will get full graphical highlights with real characters kicking the ball into the net.

After each game, you have the opportunity to revise your team list. You can also ask for a report card for yourself which gives you your current

position in the league, the financial situation of the club and a "managerial rating" of your performance so far.

If the money's getting scarce and you need some players, the bank manager will usually oblige, but it's never a good idea to be in debt. You can examine the league table whenever you wish and see how your team stands. Asking for the player list will show each player's name, whether he is fit to play and his current skill and energy ratings.

You can change your level of skill for the game at any

R·E·V·I·E·W·S

time and, to add a personal touch, you can change the names of the players as well.

There's a save game facility included, so you don't have to fit a season's work into an afternoon.

This game probably won't convert you into a football freak, but if you are one already then you'll like it.

● Graphics	8
● Sound	7
● Value	8
● Playability	8

5 PITFALL

MACHINE: CBM 64
SUPPLIER: Activision
PRICE: £9.99

The Commodore version of *Pitfall* 1 was identical to the Atari VCS game. Activision seems to have realised its mistake now and *Pitfall* 2 is far superior to the Atari sequel.

The graphics are much better. Harry now has arms and legs that actually move and the water in the lakes ripples like the real thing.

Sound is better, too. Although the Atari has good sound effects, those of the Commodore are much better and it's good to see that Activision has used them.

Pitfall 2 is set in the legendary lost caverns of Machu Picchu in Peru. As *Pitfall* Harry, you have to explore them and face the dangers within. There are hidden lakes, scorpions, deadly electric eels and lots of things to kill you.

Unlike most graphics adventure games, you have no limit on your number of lives or the time you are

allowed to complete the game.

Throughout the caverns are scattered red crosses. Whenever you lose a life, you will be transported back to the last red cross you managed to tread on and your score will also diminish.

Your ultimate aim is to score 199,000 points which you can only do by collecting all the objects and not being caught at all.

As well as 24 gold bars, you have to find a diamond, Rhonda, Quickclaw the cat and also the stone age rat. The rat, says the instructions, has to be subdued from behind. How you do this, I'm not sure.

The game only works with a joystick which controls movement and jumping.

Pitfall 2 is certainly better than number one. The game is harder, the graphics are better and there's more to do

● Graphics	9
● Sound	8
● Value	9
● Playability	8

The aliens scroll in a straight sideways line which means that, if you stay still and keep firing, it's easy to avoid being hit.

Occasionally, the odd alien will fire back but your chance of survival is still greater than in most games.

Still, someone's certainly managed to pack a lot into an unexpanded Vic and it's a good game.

There are nine different attack waves, and a bonus dodo screen after each. If you hit the bouncing dodo 12 times then you get more points.

The game uses full user defined graphics characters and the sound effects are no worse than any other Vic game.

If you're a dodo-basher at heart then this is a good way to spend some of that Christmas money.

● Graphics	9
● Sound	8
● Value	8
● Playability	8

7 MR EE

MACHINE: BBC
SUPPLIER: Micro Power
PRICE: £6.95

Now this is what I call a game with added Umph.

An Umph, at least according to Micro Power, is a creature which chases a wizard while he's trying to tunnel through the earth collecting cherries.

You control the wizard with either the keyboard or a joystick, while trying not to lose a life by being caught by an Umph.

The wizard has a crystal ball which seems to have an in-built homing ability. He can throw it at an Umph and, whether or not it hits one, it will return to the wizard's hand to be used again.

As well as the cherries on the screen, there are also some apples. Running under one of these will loosen it and it will fall until hitting some

more earth. If it hits an Umph or two on the way, then it's curtains for meany and extra points for you.

During the game, Umphs emerge from their base at the centre of the screen. When they have all trooped out, the base turns into a lump of food which the wizard should collect, adding to his score.

Apple-eating monsters then emerge which can still be killed by the crystal ball.

Killing all the Umphs or eating all the cherries means that you move to the next screen which is a little harder. There are ten screens in all.

As well as moving and firing, you can also pause the game or turn the sound on and off. Pressing escape will end the game and you can start again.

Mr EE is a fast, colourful game with good graphics and sound. If you're an arcade addict then you'll like this.

● Graphics	8
● Sound	8
● Value	8
● Playability	8

BUZZ OFF

MACHINE: MSX 32k
SUPPLIER: Electric

Software
PRICE: £7.95

If this represents the level of MSX software then I don't think this Japanese standard is going to take off.

You are in control of one Bertie, the bumble bee, who likes eating fruit. You have to guide him round the Enchanted Orchard where he can eat the food which appears.

Each time he eats something, though, a section of a spider's web appears. Bumping into it will lose poor Bertie a life, and a huge spider will descend and eat him away.

You have to avoid the sides of the screen, too.

The game is controlled with either the cursor keys or a joystick, and passing over a fruit will let Bertie eat it.

6 DODO LAIR

MACHINE: Vic 3.5k
SUPPLIER: Software Projects
PRICE: £5.95

If you thought that you were in for a cute game about extinct birds then you're mistaken.

This is a sideways scrolling shoot-up, with your cannon on the right of the screen and the obstacles coming in from the left.

You can't move your laser further into the centre of the screen, only up and down.

Graphics Are they really as mind-blowing as the adverts say they are? Does the screen scroll effectively? Do those aliens really leap out of the screen at you? This is how this category is judged.

If Bertie can eat enough, he can get to the spider's private lair where he can eat the magical golden fruit.

There are ten levels to the game, with a choice of 9 options at the start. Selecting 1 to 8 will let you play at the chosen level, while selecting 9 will play the 'real' game by starting you at level 1 and progressing up a level each time you clear a screen.

The graphics are dull. Bertie's wings flap but otherwise there's not much movement.

An irritating little tune plays all through the game, and will probably get on your nerves.

There's nothing special about *Buzz Off*, and certainly it's not up to the standard we were shown when the MSX machines were launched late last year.

• Graphics	7
• Sound	7
• Value	6
• Playability	6

8 JASPER

MACHINE: Spectrum 48k
SUPPLIER: Micromega
PRICE: £6.95

The craze for this year certainly seems to be graphical adventure games.

This latest from Micromega is better than most, and also a lot harder.

You are controlling a cute character called Jasper who can move left to right and jump. The easiest way to remember the rules is that anything which moves will kill you.

As Jasper moves off the side of a screen, he will reappear on another. You don't have to collect all the objects on a screen at once, but you can come back to them later if you want.

Before you even start to play the game, the first thing you'll notice is that there aren't any blue and yellow flashing border stripes while

the game loads. This is a feature of Micromega's turbo loader and it works well. It also gives you a chance to enjoy the title screen without being hypnotised at the same time.

The graphics are gorgeous. Bees hang from trees and rather large bees flap their wings as they fly. A rabbit hops around on some of the screens and his back legs move in and out just like the real thing. There are also leopards after you which move very realistically.

The instructions, which come with the game are deliberately brief. The idea is that you find things out for yourself, just like in a real Adventure. Some of the objects which are lying around should be collected and will help you on later screens. Others won't.

A tune plays in the background during the game, though you can turn this off.

All in all, a good, non-violent game. Unless, of course, a coconut falls off the tree and squashes the bunny!

• Graphics	9
• Sound	8
• Value	9
• Playability	8

FELIX

MACHINE: BBC
SUPPLIER: Program Power
PRICE: £6.95

If you always thought that you could beat any computer game then you probably haven't tried this one. It's hard, and I mean hard.

Weevils are those furry creatures which shoot

through tubes in children's TV programmes while the sound effects department provides suitable squeaks.

In this game, the tubes and pipes are on the screen and our yellow furry friends are still there. But computer games need violence, so Micro Power gives you a never ending supply of pesticide to spray into the face of the oncoming weevil.

As well as weevils and tubes, there are lots of conveyor belts and ball bearings. If you manage to reach the lever, you'll be able to reverse the belt and bring a weevil towards you ready to spray it to death. If you get run over by a ball bearing, you lose a life.

There are oxygen cylinders scattered around, too, which will help to keep you alive, as will the emergency panic button. This makes you immune to weevils.

A good game from Program Power. It's hard but good. Sound effects are included, although you can turn them off if the neighbours are trying to get to sleep while you're still trying to swat a weevil.

BATTLECARS

MACHINE: Spectrum 48k
SUPPLIER: Games Workshop
PRICE: £7.95

It seems that all those BBC documentaries have finally paid off. The year is 2084 and road accidents are now a thing of the past.

Which is a shame for the population, as they have nothing to amuse themselves with any more. The world is such a safe place and they miss all the blood now the roads have been replaced with Autocot tracks.

But, luckily, someone has

CLIFF HANGER

AUTHOR - JAMES DAY ORIGINAL MUSIC - BRIAN DOE

Thrill to the cartoon style action of Cliff Hanger, a really original, Wild West game. As Cliff the hero, you've got to stop the bandito shooting up the canyon. But with its own brand of wacky cartoon action fun, things simply aren't as they seem in Cliff Hanger. For a start, the boulder you throw at the ol' bandito may just come bouncing back at you.

Cliff Hanger incorporates all the elements that have made New Generation games best sellers for the Spectrum, such as original ideas, superb graphics and hilarious happenings - but now it's available first for the Commodore 64.

Featuring 50 separate screens, three levels of difficulty, one or two players scoring, Hall of fame and joystick compatibility or user defined keys, Cliff Hanger is set to be **THE** Commodore games playing sensation. Available from any good software store for just **£7.95**.

Shoot the Rapids

AUTHOR - PAUL BUNN

Ever wondered what it would be like to face the fierce white water in a top class canoeist slalom run? Well wonder no more because you can enjoy the fast action thrill of competitive canoeing from the comfort of your own armchair with *Shoot the Rapids*.

It's a game that involves real skill because you must move your joystick to simulate paddling action. You must get through the gates of the slalom course in the fastest time possible, while avoiding the river bank and rocks. There are also extra hazards like rogue speed boats and interfering beavers to worry about.

This multi level game features increasingly difficult river courses with superb graphics and smooth scrolling along the river.

Qualifying times have to be reached to move onto the next course.

With Hall of Fame, one or two player scoring and joystick compatibility, *Shoot the Rapids* is probably the best sports action simulation game devised to date. Available from any good software store for just £7.95.

REWRITE THE HIGH SCORE TABLES

With the Gunshot, you'll have all your enemies cowering in corners. 8-directional action and an all-in-one moulded stem allows accurate annihilation and strength to survive those all-night sessions. Dual fire buttons for fading fingers (and a rapid fire version when they're really coming thick and fast). And, if you break it (and we know you'll try) our 12 month guarantee will prove invaluable. The Gunshot plugs directly in to practically all popular home computers (ask about Vulcan interfaces for the BBC, Spectrum, Electron, C16, Plus 4). Only £8.95.

See the range of Vulcan joysticks and interfaces at your local stockist ... we'll see you on the high score tables.

VULCAN
ELECTRONICS LTD
Joystick Genius

200 BRENT STREET, HENDON, LONDON NW4 1BH. 01-203 6366

Value: Is the game really worth all those pennies? How long will its attraction last? Is it worth going without Computer & Video Games for a month because your parents won't give you any extra pocket money — or could you write a better listing?

found some old 20th century cars so I'm in search of an old road to race them on. It doesn't take long for the sport to become a success, especially when a famous driver is actually killed. They're a savage lot a hundreds years from now, you know.

Battlecars becomes a sport. The computer version is either for one or two players. You can play against a friend or the computer. The cars are fairly complex machines with 12 keys used to control each car. Luckily you get a keyboard overlay to help you remember which buttons to press to fire which piece of your mobile arsenal.

On the other side of the tape to the main game is a program called *Designer*. With this, you can design your own battlecars and the artillery which they will carry.

The screen shows two windows at the top. One is used to show the position of each car. You see the car itself and the immediate surroundings. At the bottom of the screen is a diagram of the cars and their artillery, and also a map of the whole track.

This is certainly a long way from *Chequered Flag* and not really as good. The idea is pretty silly, but then so are quite a few computer games at the moment. Animation of the cars is very slow and the track moves a whole character at a time across the screen. Most of the game is written in Spectrum Basic which just isn't fast enough.

There's a lot to playing this game and you'll certainly have to study the 16-page manual for some time. Personally, I don't think it's worth it. It's one thing to have a good idea for a game, but another one to actually write the program.

And one out of two isn't good enough.

10 TURMOIL

MACHINE: Spectrum
SUPPLIER: Bug Byte
PRICE: £6.95

As platform games go for the Spectrum, Bug Byte started it all with *Manic Miner*.

Turmoil continues the craze which the company started and it's just as good.

You're a mechanic and, once you've collected an oil can from the side of the screen, you have to take it to the top of the screen and fill the can from the leaky tank.

Then, take your can of oil and pour it into the car, which gradually takes shape.

It takes more than one journey to make a full car, though. When it's done, you move to a harder screen.

Like *Manic Miner*, you have to complete one screen before you can move on to

the next. If you lose all your lives, you start again from screen one.

There is a training mode, though, which lets you practise the harder screens but you don't score any points this way.

The screens are beautifully animated, with conveyor belts and trampolines to help you escape from the Arabs. Well, what do you expect with all that oil about? They're after that oil and, if you run into one, you lose a life.

You can defend yourself by dropping some oil around the screen which will kill anything it touches. But this means that you'll need even more trips to the tank to fill up the car.

Graphics are as good as any similar game on the Spectrum and sound effects are as bad. But it does play a reasonable version of *Stand Up and Fight*, from Carmen

- Graphics 8
- Sound 8

- Playability 8

11 STAR AVENGER

MACHINE: Amstrad
SUPPLIER: Kuma
PRICE: £6.95

Every software collection needs at least one scramble game and this is a very playable version of the old classic.

There are nine different scenarios to fly through, each one harder than the one before. At the start of a mission you can choose which path you wish to fly, so that you don't spend ages mastering the first few levels in order to reach the harder ones.

You can select from five different skill levels which will keep even a hardened keyboard-basher happy well in 1985.

The game doesn't seem to like a joystick, though. There are no instructions on the cassette inlay, and the demo sequence made no mention of one.

Leaving the keyboard alone will take you through an impressive title display, showing what happens when you reach the end of a scenario.

Use of colour and graphics is excellent, with some stunning multicoloured characters.

If you only have a green screen then you're missing out on some of the fun, but the game is still worth playing.

Sound effects are fairly tame for a space game like this, though. Guns and explosions are replaced by a happy little tune.

Control via the keyboard is always difficult and this is the only drawback to a good, if fairly unoriginal game.

All the stuff that you strap on your helmet, check your
instruments, gun your engine and surge onto the course.
Through the corners, up the hills, into the ruts and down the
straight you manoeuvre for position and try to beat the
clock.
Stay ahead if you can. But whatever you do, stay on
yourse.
Every minute if you can. But whatever you do, stay on the
course.
If you don't, one of two things will happen.
You'll slow down and lose valuable seconds getting back
into the race. Or worse, you'll end up on the seat of your
pants.
Who says computers don't like to get dirty?

Your agents risked their lives to find the enemy's secret
headquarters.
Now you're risking yours to destroy it.
And they know you're coming.
Time is short, so you'll have to fly. But fly too fast, and you'll
squander your precious fuel supply.
Needless to say, they don't issue parachutes on missions
like this.
As you soar over hundreds of miles of distinctly unfriendly
territory, the action is fast, fast and lightning-quickly three-
dimensional.
Fighter aircraft. Surface-to-air missiles. Helicopter gunships.
The attacks come from every direction.
Even from behind.

Edison, the kinetic android, leads a frustrating life.
All he really wants to do is build his circuit boards and go
with the flow. But things keep getting in the way.
Ghosts — a Negative Intelligence — bug him regularly. They're
harmless. But only from a distance.
Flick the lightning bolt, disconnect everything in his
path. Which can be frustrating after dark and day on the
circuit.
And the cunning Killercat is out to try poor Edison's brains.
But our hero simply soldiers on.
Juice! is the ultimate current event. You'll get a charge out
of it. And a few joits, too!

Sound: Does the game sound like a Duran Duran LP played at half speed — or does the noise from your micro knock you half-way across the room? The C&VG review team don't judge games with their ears plugged up, we can tell you!

12 MICROGO

MACHINE: BBC
SUPPLIER: Edge Computers
PRICE: £9.95

If you always thought that Scrabble was the only decent board game for a micro, then you can't have seen this one.

Go is simple to learn but can take years to master. The board is a grid of eight by eight squares made up of nine lines in each direction.

There are two players and they take turns to place a black or white counter, or stone, on a place where two lines cross. That area is then marked out as that player's territory. At the end of the game, the player with the most territory will win.

To capture a player's stone you have to surround it. To surround a single stone will take four of the opponent's stones unless the piece is on the edge of the board, in which case you'll only need three.

Microgo is very well written. The computer's response time is around three seconds on the Beeb but a little slower on the Electron. Graphics are good and the few sound effects are just right. And not too loud, either.

If you still have a headache from all that Christmas pud, settle down with this for the afternoon — it's a lot less fattening.

13 SCRABBLE

MACHINE: BBC
SUPPLIER: Leisure Genius
PRICE: £12.95

Scrabble must be the last word in the long-running BBC vs Spectrum debate.

Scrabble on the Spectrum was licensed from Leisure Genius and written by Psion. Now,

Leisure Genius has brought out the game for the BBC.

With only 32k compared to the Spectrum's 48, you'd assume that the game wouldn't be quite as good. In fact, there's no comparison.

The list of words which the computer knows has been reduced from 11,000 to 6,000, although you can still challenge the computer if it doesn't recognise one of your words.

The game is for one to four players and the idea is to form words from the letters you are given. The words must be placed on the board in cross-word fashion, so that it links to another word already there.

You can select which, if any, of the four players will be played by the computer. If any are, they can be given one of four skill levels. If you don't really feel like playing a game, set up a match with the computer playing all the parts. Then, just sit back and watch the machine play itself.

Apart from the limitations, the game plays as well as any other version. If it's a game of *Scrabble* you want and you don't care what the screen looks like then you'll enjoy this. But screen layout is so bad, obviously to conserve memory, that it becomes tedious to stare at it for any length of time.

- Graphics 5
- Sound 7
- Value 8
- Playability 8

14 KENSINGTON

MACHINE: CBM 64
SUPPLIER: Leisure Genius
PRICE: £12.95

This game is based on the board game and not, I'm assured, on the Kensington Killer sandwiches which our friendly sandwich man brings around to the office every morning.

Kensington is a strategy board game from the people who brought you *Scrabble* and *Cluedo*.

The board consists of seven intersecting hexagons of which three are white, two blue and two red. One player is blue, the other red, and you must place your counters so as to occupy either a white hexagon or one of your own colour.

There are two parts to a game. In part one, players alternately place one of their 15 stones on one of the intersecting lines which make up the playing area. When this is done, you can move your stones along the lines of the board.

You can either play against another person and use the

computer as a board, or play against the computer on your own. The machine has three skill levels.

If you like board games but can never find a willing opponent then this is certainly one for your collection.

- Graphics 8
- Sound 7
- Value 7
- Playability 6

15 CLUEDO

MACHINE: CBM 64
SUPPLIER: Leisure Genius
PRICE: £12.95

The murder was committed by Miss Scarlett in the Dining Room with the Candlestick.

Sound familiar? Well, it ought to — it's *Cluedo*, one of the most popular who dunnit? board games ever, and now Leisure Genius has brought it out on the CBM 64. Playing the game on the 64 takes you right back to Christmas holidays when, so sick of re-runs of films seen hundreds of times before, you would switch off the TV and out would come the board games. At least playing with the 64 you can commandeer the TV as well!

The plot plays like something out of an Agatha Christie novel. Mr Black has been murdered — there are six of you staying in his house. One of you is the murderer and it's up to the players to sniff him out.

Depicted on the screen is an exact representation of the board game complete with Col Mustard, Professor Plum, the rope, the kitchen, the ballroom and those gory instruments of murder — the rope and dagger.

A great game which, I should imagine, will provide hours of fun this Christmas. A word of warning though — don't cheat — the computer doesn't like it!

- Graphics 8
- Sound 6
- Value 8
- Playability 8

R·E·V·I·E·W·S

Playability: Will the game keep you up until the early hours of the morning, as you attempt to complete just one more screen in a desperate attempt to beat it? Or does it send you to sleep the moment the intro-screen appears? Could you spend hours locked away in your bedroom with it?

16

KNIGHT LORE

MACHINE: Spectrum 48k
SUPPLIER: Ultimate
PRICE: £9.95

The adventures of Sabreman are finally drawing to a close with the release of *Knight Lore*.

After the encounter with the Sabre Wolf, our hero has now reached Knight Lore castle. His aim is to seek the Wizard, who can rid him of a spell which turns Sabre Man into a Werewolf during

This hideous spell upon your soul.

To lose its hold must be your goal. Beware, the traps from here begin.

The cauldron tells what must go in.

To break the curse and make the spell.

To save yourself and make you well.

Like real adventure games, you can use the objects lying around. If you can't reach something that's too high, move a table so that you can stand on it.

You may even have to carry objects from one room

to another to put them to best use.

Control is via the keyboard or joystick. You can choose between Kempston and Interface 2.

At the bottom of the screen, a moon and sun move alternately across a sky to signify night and day. By day you take the character of Sabreman but, as the moon rises in the sky, you become a Werewolf.

I did find it annoying having to wait while my character changed personality twice each day, but that's what you pay for having a wizard putting a spell on you.

You have a time limit of 40 days to find the wizard, though each day lasts just a few minutes in "real life".

I've never seen graphics as good as this on any micro game. No wonder it's taken so long to appear. Like many other software companies, Ultimate claims that their game takes the Spectrum to its limits.

Play *Knight Lore* and you'll believe them.

• Graphics	10
• Sound	8
• Value	9
• Playability	9

the hours of moonlight.

This game really is what I call a graphical adventure. You have to guide Sabreman through the hundreds of rooms in the castle, avoiding the obstacles and collecting any treasures.

What makes it special is that it's all in 3D, just like *Am Attack* but better. Each screen is a mini adventure in itself and will take some time to solve.

As with Sabreman's other adventures, your clue comes in the form of a poem printed on the cassette inlet.

Knight's Lore's is called "The Most Tunes" and says: "The Wizard's older now than all. His help you seek within his wall.

For forty days your quest may last. Locate the potion, make it fast.

17 UNDERWURDE

MACHINE: Spectrum 48k
SUPPLIER: Ultimate
PRICE: £9.95

Like all of Ultimate's games, this one took a long time coming but turns out to be well worth the wait.

Underwurde is a multi screen adventure, along the same lines as *Sabre Wolf*, and features the further exploits of Sabreman.

The *Underwurde* must be the largest map ever crammed into a Spectrum. According to Ultimate, there are around six HUNDRED screens.

At the top of each screen is shown your score and how deep you are into the *Underwurde*. Your aim is to reach the surface by climbing through all the levels.

One complaint about *Sabre Wolf* is that most of the screens are the same. The flowers may be pretty but there are too many of them.

You can't say the same for *Underwurde*. Each screen is different and the objects and aliens are as good as any previous offering from Ultimate.

So how do you get out from the *Underwurde* and what will be there to greet you when you make it? The only clues come from a rhyme on

17

the cassette inlet which tells you little about the game. Like all good adventures, you'll have to find out the rest for yourself.

Your direction controls are up, down, left and right which can be controlled by a joystick or the keyboard. My only gripe about this game, and all of Ultimate's others, is that the keyboard control is difficult. For some reason, they always seem to choose difficult combinations of keys.

The fire button will let you use the weapon which you are currently carrying. Your weapon will defend you from the nasties which, although they won't kill you, will knock you from where you happen to be standing.

My favourite screen so far is a moon-like surface on level 20, with pulsating bubbles floating up to the surface. You can ride a bubble upwards, but it's not easy.

The cassette is turbo loaded and only takes a couple of minutes to load which should also cut down on piracy. If your tape deck isn't too hot, you may have problems. But as the tape's guaranteed for three years you should be all right.

Sorry? Oh, my verdict? Buy it, of course!

Based on the SPY vs SPY characters created by Antonio Prokias and the property of E.C. Publications Inc. and used by permission. Licensed from First Star Software Inc.
BEYOND Campaign House, Farndon Road, Market Harborough, Leicestershire LE19 9NR

One of my greatest pleasures as a child was in getting mail. I used to spend hours clipping box-top coupons in the expectation of receiving thrilling items like secret rings, funny money and comics.

So here I am, all grown up, sorting through my mail — when my eyes light upon a small manilla envelope. I savour the wonder of what's inside. I tear it open to find... a rubber dagger?

There's nothing else in the envelope. A tag is attached to the blade and says "Joke and Dagger". The words sound familiar. I give up and turn back to the more mundane world of letters and bills.

Next week, Monday morning, another manilla envelope. It doesn't feel like a dagger though. Well of course not — what's inside is a pair of dark glasses and a fake beard. An enclosed card answers the mystery. It's an invitation to meet Antonio Prohias, the artist/writer of *MAD Magazine's* *Spy vs. Spy*, at a reception honouring 1st Star Software's release of the computer game of the same name.

The reception is in the lobby of Warner Communications' New York office at Rockefeller Centre. I arrive as inconspicuously as I can, in my leather coat, dark glasses and fake beard. No one pays any attention to me. They must think I'm one of the staff from *MAD Magazine*. I spy my quarry over in a corner, talking. These are the two principals responsible, Antonio Prohias and Fernando Herrera.

Antonio Prohias narrowly escaped the wrath of Fidel Castro because of the anti-Fidel political cartoons he had been drawing for the Cuban press. He came to America and began the antics of his two "Spys" for *MAD Magazine* over 15 years ago. The result — a worldwide readership.

Fernando Herrera started 1st Star Software in 1982. Herrera was born in Bogota and studied architecture at the National University of Colombia. He came to the United States in 1966 to pursue graduate work, married and "settled down". For over ten years he sold household goods, and then worked on the design of lifts for skyscrapers.

A harmonious chord was struck when Atari released its personal computer in 1979. Herrera's son Steve had been born with cataracts which made vision nearly impossible. Herrera was appalled at the lack of software available for young children with sight disabilities and decided to design his own. The result was *My First Alphabet* which won the first 'Star' programming competition sponsored by Atari.

Herrera decided that the next step was to make a big splash in this new industry. His next program was *Astro Chase*... *There Is No Escape!*, a space shoot-'em-up

We want to welcome a new feature to *C&VG* in the shape of Marshal M. Rosenthal's *Letter From America*. Marshal will be bringing you news of the American games scene plus a general view of what's new in the USA. He kicks off this issue with a look at the company behind Beyond's new release *Spy Vs Spy* based on the characters in *MAD Magazine*.

featuring extraordinary graphics coupled with animated intermediate screens. *Astro Chase* has been a big seller for the Atari computer, winning many awards including the recent 1984 science fiction fantasy game of the year arcade award from *Electronic Games* magazine.

1st Star recently became affiliated to Warner Software, the new subsidiary of Warner Publishing Inc. As *MAD Magazine* is also under the Warner umbrella, the mingling of the two battling "Spys" and proven programming talent was inevitable. Such games as *Boulder Dash* and *Flip and Flop* have shown 1st Star's ability in rendering and animating cartoon images for computer gaming.

I moved closer and hid behind a large colour monitor running the game. I snaked out a hand and returned with a joystick.

The program, designed by Mike Ridel, offers lush colours and interactive features as you take your "Spy" through a multitude of rooms in a foreign embassy. You are searching for a hidden briefcase containing a secret document to take back with you to your own government. To escape, you must also find a passport, keys and plenty of money for the trip.

In the style of the comic-strip, you must also avoid being stopped by the other "Spy". Whether you play against the computer or another player, both "Spys" are constantly visible through a split screen. Booby-traps can be set for the other "Spy" and at times, hand to hand combat occurs. Lots of noise and animated graphics, but no "real" violence. A lot of the emphasis is on strategy and planning. Maybe so, but I found a great deal of

satisfaction in using my joystick to control Black Spy to whop the beejeepers out of the White one.

I returned the joystick and walked over to Herrera. He offered no resistance to my asking him a few questions, maybe because I showed him my "dagger" invitation.

"We've had great responses in England — our games have been up on the lists for many weeks," he said. "Young people there are different to those in the U.S. — they catch little details which we overlook and appreciate them more. I feel that the British are more into strategy than us action-oriented Americans. It's a different taste, but a good program will do just as well there as anywhere else. Entertainment is universal."

Asked about how *Spy vs. Spy* would do overseas, he commented that he had excellent expectations due to its inherent mix of strategy and confrontation.

Herrera mentioned that he now supervised programmers in his company as well as writing his own games. He worked on the concept for *Spy vs. Spy*, as well as *I Love My Alphabet*. But programming is still his first love. "My newest program," he says, "will be coming out in late January of 1985. I've no name for it yet, but I refer to it as *Genie* as it unleashes the spirit of the computer to do your bidding. I hope to finally reach that bottom line of justifying the fact of having a computer at home."

As he left I reflected on the reasons for 1st Star's success.

The ingenuity and willingness to have fun is very much a part of the personality of Fernando Herrera and of his company. This is why 1st Star will continue to thrive.

LETTER FROM AMERICA

SPY VS SPY COMPETITION

Solve this *Spy Vs Spy* caper and win Beyond's new game, based on the characters in *MAD* magazine, plus £1 OFF your next Beyond game.

What happened in the final missing frame of this Prohias cartoon?

1. White Spy lurks within the safe and strikes Black Spy with a hammer.
2. A giant spring pops out of the safe and propels Black Spy across the room to land on the nails.
3. White Spy lurks within the safe and pokes Black Spy in the eye with a boxing glove.
4. A magnet hidden inside the safe attracts the nails across the room to impale Black Spy.
5. When the safe opens, Black Spy is buried under a torrent of hammers.
6. An enormous nail shoots out of the safe through Black Spy's head.

Created by Antonio Prohias, the secret agents dressed in black and white first appeared in *MAD* (c) magazine in 1960. Their antics, as they battle for supremacy over each other, have been enjoyed by millions in paperback as well since 1972.

Now Beyond has launched *Spy Vs Spy* as an animated cartoon adventure on the Commodore 64. It's an innovative game which can be played in real time on a split-screen display. Both players (human and computer or two humans) move and fight simultaneously — they don't have to wait their turn. They take the part of White Spy and Black Spy, the cunning and resourceful secret agents. Each has the same objective — to uncover a set of secret plans hidden in a foreign embassy. A mission which must be accomplished at any cost.

Humour is the keynote of this game. As the spies race against time, they can plant a variety of deadly weapons to hinder their opponent. When a spy falls victim to one of the many giant springs, tripwire guns or electrified doorways, he gets capped in true cartoon style (only to return seconds later miraculously cured for his next foray). The successful spy escapes from the embassy and flies away to the next adventure. *Spy Vs Spy* if will be published in the USA during 1985.

Beyond will award a copy of *Spy Vs Spy*, the computer game, and a year's subscription to the UK edition of *MAD* magazine to the first ten correct answers

to the competition. And there is a prize for everyone else too: all entrants will receive a special £1 OFF BEYOND GAMES VOUCHER with the next edition of the Beyond Newsletter which is due out early in December.

To enter the competition, simply look at the Prohias cartoon. The final frame has been deleted. What happened? Consider the six possible solutions, choose one and send it on a postcard together with your name and address to: Computer & Video Games, Priory Court, 30-32 Farringdon Lane, London EC1 3AU. The first 10 correct answers received by 16th January will be awarded the prizes. All entrants will then receive the special Beyond £1 off voucher.

MAD magazine is published in the UK by Saxon International Publications, 44, Hill Street, London W1. MAD subscriptions cost £7.20 per year. The cartoon is reproduced from MAD Artists Special.

£9.95

To date, Atari's most astonishing game is Pole Position... If you are only going to buy one game, then this is the one you should get.

COMPUTER & VIDEO GAMES.

...Pole Position gives a very strong sense of speed as you hurtle round the track. The super-realism of the three-dimensional effect adds a lot to the game. It is a great graphics demo.

PRACTICAL COMPUTING.

Brilliant!

WHICH MICRO? AND SOFTWARE REVIEW.

...a terrific version of the arcade motor racing game...graphics are superb...sound, too is very good as brakes screech and engines rev-up.

PERSONAL COMPUTER GAMES.

Exciting, exhilarating, excellent, Pole Position takes the lead as the best Atari race game around.

PERSONAL COMPUTER NEWS.

What can we say?

We're overwhelmed. Though we should just add that with Atarisoft, you can now play Pole Position* on the Commodore 64, BBC and Spectrum computers, as well as on all Atari® systems. And you'll also find available other games such as Galaxian,* Robotron! Moon Patrol! and Ms Pacman.

POLE POSITION

£7.95

When people started queuing up to play *Space Invaders*, pinball was at its lowest ebb. It was stuck in another era — one of relays and stepper units. The pinball manufacturers were slow to react, possibly waiting for the video bubble to burst. When it didn't, they suddenly scrambled to make micro processor controlled games. Unfortunately, the games themselves weren't any different and pinball still wasn't making much impression on the mighty video market.

What was needed was innovation. Williams found it and they produced a string of classic games: *Flash* the first with background sound, *Gargar* the first to talk, *Fire Power* the first electronic multi-ball and *Black Knight* the first with a two tier playfield. Pinball blossomed. These games had rekindled the interest of established players and won over many new ones. All was rosy in the garden. Then, around '82, the unthinkable happened. The arcade video bubble did burst.

This time the manufacturers were swift to react, almost overnight. Pinball went back to basics. So this is the state of the art and there are many youngsters who think that they have just discovered pinball. There is good and bad in this situation. On the good side, pinball machines are cheaper to produce and lots of kids are having lots of fun which has to be good for the game. On the bad side, old addicts like me are finding that the game is not quite so challenging. However, as pinball and its new found devotees move on, perhaps we will come back to *Black Knight* type games. Either way the steel ball lives on.

Every year, early in November, there is a large arcade show held in London.

It is a trade show only, where all the latest games are put on display to tempt arcade owners into parting with their hard-earned coppers.

Computer & Video Games was lucky enough to go to the show to bring you news on new releases and to advise you what to look out for in your local arcades. We have had a look at a few games this month and will be covering others over the next few issues.

FLY BY NIGHT! FUTURE SPY

Future Spy, a game that looks amazingly like *Zaxxon*, has just hit the streets.

It's a modern shoot-'em-up using the familiar story of a fighter plane flying over enemy territory blowing up their navy, rocket bases and ammo dumps.

The graphics are excellent and your fighter jet leaves a clear shadow as it zooms over enemy terrain. Lining up your shadow on targets allows you to bomb or torpedo the enemy accurately — hopefully before they can send heat-seeking missiles after you.

You always know when the enemy have locked their radar onto you and dodging the rockets can be a pretty hairy business.

Once you've used your torpedoes and bombs to destroy the enemy and, most important, their flagship, your plane will fly through a thunder cloud which results in a 'time slip' to a different dimension of space.

As in *Zaxxon*, this is a god-sent opportunity to gain as many bonus points as possible.

It's a long path to victory and you'll have to fly sorties by day and by night to get the better of the enemy. The night scenes are cleverly done as the player gets the impression of flying through the dark and seeing the targets through an infra red radar.

In fact, as you fly over the targets, a spotlight shines on them allowing you to line up the shadow of your jet so you can see more clearly what's happening.

Although this is not an original idea, it's successful in that it's very exciting to play. *Zaxxon* is such a popular game that you can't go far wrong in using it as the basis for another game.

HIGH SCHOOL PRANKS

MIKIE

If you've just escaped from school for the holidays, the last thing you'll want is to play a game which takes you straight back into the classroom.

Konami chose to unveil what can only be called a weird game, at the Preview '85 exhibition in London recently.

Mikie is the name of the game and also of its hero. The action takes place in the form rooms of an American school in what must be one of the most bizarre games around.

Mikie is the type of guy whose world centres on the female race and probably thinks himself a bit of a gigolo into the bargain! He

has obviously never heard of work and spends his days in a female dominated classroom sending love letters, knocking girls off their chairs and generally creating a nuisance.

In fact, the story is a little

more complex — *Mikie's* great love is the cheer leader and he uses the other girls as go-betweens. Needless to say, life is not all a bed of roses. Half the masters in the school would like to catch him and give him a good

THE DON TO THE RESCUE!

DON QUIX-OTE

Preview 85, one of London's largest arcade shows, was held at the end of October. A whole new batch of games was on show many of which we will be taking a look at over the next few months.

Always on the look out for new and interesting games, I was drawn to *Super Don Quix-OTE* from Universal. It is a laser disc game played in the *Dragon's Lair* style.

Presumably the story line is based on Cervantes' famous novel of Don Quixote and his faithful companion, Sancho Panza.

In the arcade version, Don Quix-OTE's love Isabella has been captured and imprisoned in a castle many leagues away.

Don Quix-OTE sets out to rescue her but keeps running into trouble. His adventures are long and varied but he's nothing if not determined and makes it to the castle in the end.

The story also deals with the age old subject of good against evil. The evil this time

thrashing. Poor Mike has to take to his heels and run.

As you get better at the game, you graduate from the classroom to the locker room, to the canteen and finally the gym. The gym is a sight for sore eyes - half the girls are in a state of undress and are posing in their leotards waiting for Mike to make an appearance.

Mike is a game of colourful graphics and not much else. A certain element of skill is needed to collect and deliver the heart-shaped messages and in escaping from the powers above, but it's not a game to set the adrenalin running. Give me a shoot 'em-up any day.

The Japanese must have a very odd idea of what American boys study at school - O levels in love-letter writing or degrees in chatting up women perhaps!

is in the form of a demon who, looking down on the world from a great height, becomes determined to throw everything in Don Quix-OTE's path to prevent him rescuing Isabella from her plight. Time after time our hero manages to wriggle out of trouble by the skin of his teeth.

The graphics, as in *Dragon's Lair*, are cartoon animated. The movements of all the characters are very smooth and beautifully depicted.

The movements of the game are directional only, as in similar laser disc games. The story unfolds in front of you and a sign appears telling the player how when Don

Quix-OTE has to make a move - whether it is a change of direction or to use his sword.

These signs are unsightly and rather crudely drawn. A large arrow appears pointing to the direction the Don has to move and a large gold disc flashes next to his hand when he needs to use his sword.

In *Don Quix-OTE*, the arrows and discs give you the advantage of knowing when to make your move and may make the game more popular in that respect. Time will tell.

However, the game isn't

quite that simple. If you don't act on the sign immediately, you will lose a life. Still, it doesn't take long to learn the moves and when to expect them.

I don't think *Don Quix-OTE* is as much fun as *Dragon's Lair* but it is a lot less frustrating and should be a real catch in the arcades.

If you know of any hints and tips or snippets of information on your favourite game, write into Arcade Action and we'll print them if they haven't been published already.

Sinistar

How to get 255 Men!

Play two players. Lose all of player one's lives. Then stock player two full of all 20 Sinibombs. Of the last life of player two, fly directly at the Sinistar and drop every bomb. While the Sinistar is chewing you up, the bombs home in and wipe out the Sinistar. Roughly 50% of the time you will get awarded 255 lives.

Stargate

2000 point "Zowie" bonus. Pro catch etc.

Shoot everything but one lander on a wave. Follow the lander until he picks up a humanoid. Shoot the tender with the humanoid underneath. Let the humanoid fall and position your ship on the planet's surface and directly below the humanoid. The humanoid will touch you and the surface at the same time. The screen flashes and you are 2000 points richer.

Tempest

This is the key to high scores on Tempest...

HINTS and TIPS

lan the Boff's been at it again and, from learned study of arcade games, has come up with a few more hints and tips to those yearning to get those extra 1000 points or an extra life. Read on.

First you must complete the red level that gives you 188,000 bonus points. Then get your score to one of the two digit combinations listed below (by shooting spikes, worth one point per hit). After you have the combination you require, kill yourself by walking into enemies and wait for your desired effect to happen. They are:

- 00 = Freezes screen
- 01 = Gives access to book-keeping totals
- 05 = Allows play during attract mode
- 06 = 40 free credits
- 11 = 40 free credits
- 12 = 40 free credits

- 14 = Credit sound without actual credits
- 15 = Credit sound without actual credits
- 16 = 40 free credits
- 17 = 40 free credits
- 18 = 40 free credits
- 41 = Last two digits of score switch
- 42 = Score increases quickly
- 46 = Allows following game to start at green level
- 50 = Player moves by himself
- 51 = Player moves by himself
- 60 = Objects drift down
- 66 = Objects drift right
- 67 = Objects jump
- 68 = Objects drift up
- 70 = Objects drift up

All the tricks will work if you use the one to play the attract mode (05). If you pause at any of the desired points, it will take place instantly. Also two additional ones work from this. They are:

- 48 = Generates a random coloured level with the wrong enemies for that level (eg. a dark blue level with fuse-ball tankers!).
- 48 = 255 extra men!!

Apparently Atan made a modification kit for Tempest to stop these bugs. It is also very uncommon and is not evident on any Tempests that I have played.

YOU MARVELLED AT BEACH-HEAD...
NOW ACCESS PRESENT THEIR LATEST MASTERPIECE:
RAID OVER MOSCOW

Commodore 64

The most breathtaking
3-D graphics yet seen on
the Commodore 64!

Gripping arcade action
Multiple scrolling

GAME OF
THE
MONTH

RUNS ON A BBC MODEL B

BY CARL ROBERTSHAW

SUPER SHARKS

Super Sharks was written for a BBC Model B computer by Carl Robertshaw. The program is a ship-to-ship battle simulation. It is written in BASIC and runs on a BBC Model B computer.

Super Sharks is a two-player game. Each player controls a battleship and aims to sink the other's battleship. The game is played on a 20x20 grid. The battleships are represented by letters A through H. The game is played on a 20x20 grid. The battleships are represented by letters A through H.

Each player has a battleship and a submarine. The battleships are represented by letters A through H. The submarines are represented by letters I through P. The game is played on a 20x20 grid. The battleships are represented by letters A through H.

Each player has a battleship and a submarine. The battleships are represented by letters A through H. The submarines are represented by letters I through P. The game is played on a 20x20 grid. The battleships are represented by letters A through H.

Each player has a battleship and a submarine. The battleships are represented by letters A through H. The submarines are represented by letters I through P. The game is played on a 20x20 grid. The battleships are represented by letters A through H.

QUALITY CONTROL FROM CREATIVE SPARKS ON C64

**For those
who demand
excellence**

JAVA JIM

Guide Java Jim around the screen dipping your square holes as he searches for ancient relics. You will have to avoid the lumps of sizzling lava being continually showered down on Jim from the still active volcano in this highly original fun game.

4 full graphic all action screens.
20 levels of play.
High score feature.
Fast loading cassette.

COUNTDOWN TO MELTDOWN

An amazing graphic action adventure game which puts you in charge of a team of androids trying to reach the core of a nuclear reactor before it explodes.

This game has over 2000 rooms to be negotiated and every single one of them is in 3D!

Probably the most exciting game yet developed for the C-64.
Fast loading cassette.

BIRD MOTHER

This is a delightfully original game which uses nature as the setting for a highly compelling and challenging game. Guide the Bird Mother as she builds her nest and raises her young, finally protecting them from a predator hawk.

Fast loading cassette.
The stunning graphics and music in Bird Mother are not to be missed.

WING COMMANDER

This is a highly sophisticated flight combat simulator which puts you in the pilots seat. Highly advanced machine code programming has ensured you feel every stomach lurching dive and roll.

With 17 separate controls to be monitored and several ground targets to be defended from the attacking enemy bombers, this game will stretch your skills to their limits.

Fast loading cassette.

'PSST!'

...ELLO JON GOTTA NEW COMPUTA'

Games Extra

So now you've got a new Commodore computer what are you going to do with it? We have the answer and it won't cost you a penny.

The January edition of **COMMODORE USER** has a FREE 36 page Games Extra. It contains six super listings for the 64, many written by professional authors for companies like Melbourne House and McGraw Hill. Shiver in Dracula's Nightmare, discover the North-West Passage in Francis Drake's Adventure or dodge the avalanche in Everest.

We haven't forgotten Vic owners either. Bricky, Beeglebug or dodge the traffic with Hoppa. All are published complete with our 'Easy-Enter' technique exclusively developed for **COMMODORE USER**.

Look out for the January issue of **COMMODORE USER**.
AT YOUR NEWSAGENT FROM THE 22ND OF DECEMBER.

The Complete Commodore Software Guide

Not content with one free gift, our February edition contains a 36 page Complete Commodore Software Guide. We list over a thousand programs, with prices. Whatever the software package you are after for your Commodore — from Jet Set Willy to word processors — The Complete Commodore Software Guide is the place to start.

On sale Jan 26th 1985.

Now on 48K Spectrum

The ultimate underground adventure

Superb scroll routine, described by experts as one of the best pieces of Spectrum programming ever! Sixteen mystical caves, 5 levels of play, joystick or keyboard options.

One of the toughest tests of strategy and reflexes ever! Starring 'Rockford'™ the incorrigible burrowing bug in his restless quest for gleaming jewels.

U.S. Reviews

"... Boulder Dash should be leading contender for anybody's action-game-of-the-year award." **Burt Hochberg GAMES Magazine**

"... a magical mix of challenge, charm and originality ... easily one of the best computer games of the year." **Michael Blanchet Chicago Tribune Syndicate**

"This game will be mentioned in my will ... what silicon is and integrated circuits were always meant to be ... subtle brilliance and unceasing magic ... in a class by itself..." **Craig Holyoak Deseret News**

"First Star has done a first-rate job on BOULDER DASH ... the graphics are dazzling..." **The Video Game Update**

"BOULDER DASH takes the cake ... the overall quality is excellent..." **John Skoog K-Power Magazine**

This one's hot for Xmas!

Seeing is

See the pack—see the screen—see the game.
See the difference the moment you pick up one
of the games from Firebird's new Silver Range.

The difference is that our packs show the high
quality you'll see on the screen when you play,
so you know exactly what you're buying.

Here's a sneak look at three of the NEW games:

ZULU

Wyatt Hunter has travelled through time to the centre of an ancient tribal mazo, seeking a priceless collection of 100 Zulu masks. Armed with a powerful force field and forewarned of the magic and dangers involved, can our intrepid hero survive???

MR. FREEZE

Mr Freeze is faced with a real challenge. Armed with a flame thrower he has to determine a route through the fridge and de-ice each of its six compartments. This involves jumping over ice cubes and gaps between the shelves, and avoiding flying food, lasers and guardian robots. You'll need all your cunning, timing and skill to prevent Mr Freeze from being turned into ice. B-R-R-RIII

GOLD DIGGER

OK sport, welcome to down under. Time was when those pesky misers weren't chasin' us around and things were a sight easier. Droppin' rocks on 'em will slow 'em down some!

Look out for these games in the FIREBIRD silver range at selected high street stores.

SPECTRUM: THE WILD BUNCH · BOOTY · MR. FREEZE · TERRA FORCE · VIKING RAIDERS · MENACE · EXODUS · RUN BABY RUN · CRAZY CAVERNS · BYTE BITTEN.
COMMODORE 64: BOOTY · MR. FREEZE · EXODUS · HEADACHE · ZULU · GOGO THE GHOST
VIC 20: SNAKE BITE · MICKEY THE BRICKY
88C MICRO B: BIRD STRIKE · GOLD DIGGER · ACID DROPS · DUCK! · ESTRA · THE HACKER.

believing

The same high standard applies to all twenty games in the range and all are available at the remarkably low price of

£2.50

A stylized red Firebird logo graphic. It features a central downward-pointing triangle with a white outline, flanked by two horizontal bars with flame-like details. Below this, the word "firebird" is written in a bold, black, stylized font.

firebird

SOFTWARE

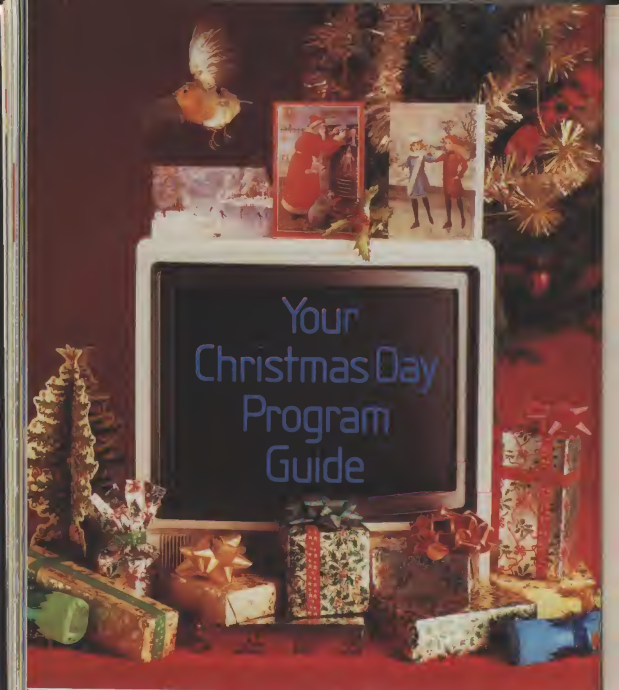

The new range from British Telecom.

You'd better believe it!!!

Your Christmas Day Program Guide

Acornsoft announce tidings of great joy for both BBC Micro and Electron owners: eight brand new programs for Christmas.

Each one makes an ideal stocking filler.

They're all available at your local Acornsoft stockist. For the address or to order by credit card simply ring 0933 79300.

Or you can send off for our catalogue by writing to Acornsoft, c/o Vector Marketing, London Road, Wellingborough, Northants NN8 2RL.

Alternatively, however, you could always take a chance and drop a line to Father Christmas.

ACORN**SOFT**
Software for the BBC Micro and Electron.

9.00 Firebug

A fast moving arcade-type game in which you are a fireman, trying to rescue some oil drums and take them to the safety of a water tank. Your opponent is the firebug who runs around lighting fires which move slowly towards the drums and fire extinguishers, destroying them if contact is made.

10.00 Maze

A gripping graphics game where you enter a top secret installation with the aim of stealing secrets from a rival company. The security system, however, has many levels each consisting of a maze of corridors patrolled by armed robot guards. Complete with full colour 3-D graphics, sound effects and a high score table.

12.00 Elite

A superb 3-dimensional graphics game that's light years ahead of any other. You are a space trader who roams the universe, making your living from buying and selling cargo in your Cobra space craft. On your travels, you will encounter aggressors who are eager to put an end to your dealings. Be warned, only the fittest will survive.

1.00 Crazy Tracer

A crazy adventure in which you guide a paint roller round the edge of a maze of rectangles, while avoiding the monsters which are trying to stop you by crushing the roller. Beware - as the game progresses, so the number of monsters chasing you will increase.

3.00 Go

'Go' is a board game for two players which originated in China 3000 years ago and is now more popular than Chess in the Far East. It requires strategic insight, intuition and a strong, calculating mind. If you wish, you can also challenge the computer at differing degrees of difficulty. A velly good game indeed.

4.00 Watch Your Weight

At last, a weight-loss program designed especially for you. With it, your computer becomes an expert wholly conversant with and sympathetic to your needs, and will help you choose an appropriate and individual weight-loss plan. The program also includes a calorie counter and a series of apposite menu suggestions to help stimulate your imagination when you just can't think what to eat.

5.00 The Complete Cocktail Maker

With everything from a Black Russian to a Betsy Ross, this program contains data sufficient to concoct a staggering 320 different cocktails.

6.00 Paul Daniels' Magic Show

Stun and amaze your friends with your astounding feats of magic. This program contains ten tricks to be performed by or with your BBC Micro/Electron. Hurry though - it's bound to disappear fast.

64 SYNTH

The Commodore 64 has been praised many times for its graphics, ease of use and cheap price. But one of its more remarkable features, the sound generator, has received very little press.

Fortunately, Matthew Harding has written a synthesiser program for C&VG which exploits the 64's sound capabilities to their full and, we think, stands up well against most professional music packages.

Some of the features that are contained in the synthesiser include up to three separate voices playing simultaneously, a five octave range and the ability to define your own "envelopes" to produce sound like a guitar or a piano and create complex drum beats.

Getting to grips with 64-Synth will take some time, but do persevere — it'll be worth it.

Do remember to tune in your TV set properly and turn the volume up.

Aerial arcade action from Synsoft

BOMBS AWAY!

ATARI
64

Play this multi-level extravaganza three different ways. You and your chopper must bomb and face on six enemies, navigate hazards like deadly laser beams and hyper-energy chambers, rescue 18 trapped friends - and shake your way through the most demanding, maddening set of caves ever devised. Super graphics, unerring sounds, constant scrolling, plus randomly placed dangers to the game is always new. You can't really practice - and pop!

You're at the controls for this World War I dogfight game.

Shoot down enemy planes, bomb targets, strike tanks and gun emplacements - there's constant action on the incredible 3-D diagonally scrolling screen. At the same time, you have to keep track of altitude, speed, fuel and damage. (Media) Don't come easy. You must master a series of flying skills and perform them with pinpoint accuracy. One slip and you've lost it all - even your life. Happy landings, ace!

synsoft

A lively, imaginative alternative to rockets and bombs. Your Drell builds squares, enemies knock them down. Quick reflexes, intelligence and strategy are a must.

Commodore 64 & Atari

One of the most challenging arcade games available! Incredible 3-D graphics, diagonally scrolling screen, super sound - all in great detail.

Commodore 64

Exciting 3-D action! The most realistic point-of-view game you've ever played. Navigate through asteroid belts, destroy enemy ships, and more!

Commodore 64

GH0STBUSTERS™ THE COMPUTER GAME.

BY DAVID CRANE

1984 COLUMBIA PICTURES

Yes. Ghostbusters is a computer game, too. The game play follows the film with incredible accuracy. Even down to the chart-topping music score.

Your task is to rid the world – and in particular New York City – of a cataclysmic plague of ectoplasmic nasties.

Designed by USA's David "Pitfall II and Decathlon" Crane and running on Commodore 64 cassette and disk and Spectrum. Coming soon on other systems.

WOOLWORTH

John Menzies

and leading multiple retailers and specialist computer stores

Herbie Briggs has just destroyed the myth that all floppy discs are created equal.

They seem equal. Until you look at the seams.

That's where equality ends.

Most companies seal their discs with a spot here, a spot there. Leaving most of each seam not sealed at all.

Sooner or later, the seams might do what comes naturally: they bulge. Warp. Pucker. Open up.

Pens, pencils, fingernails—even a four-year-old's, like Herbie—can catch and snag in those wide open spaces.

That's sloppy. And dangerous. Because if you put a sloppy floppy into your disc drive, it can jam your drive. Ruin your drive head. Lose your data.

So much for their seams. Ours are different.

THE SLOPPY FLOPPY:

Sealed with a spot here, a spot there. Leaving unsealed seams everywhere.

Memorex uses a process we developed, called Solid-Seam Bonding.

Solid-Seam Bonding seals shut every inch of every seam of every Memorex® floppy disc. Tight as a drum. That makes the Memorex

floppy stiffer. Stronger. And your data safer.

To resist buckling, warping, puckering, or opening up.

MEMOREX SOLID-SEAM BONDING:

Every inch of every seam is sealed shut. Tight as a drum.

To resist all the things that can jam your drive, ruin your drive head, or lose your data.

Which proves that a Memorex floppy disc isn't equal to all the others. It's better.

Solid-Seam Bonding is just one example of the extra care that goes into every Memorex floppy disc. Be it 8", 5¼" or the new 3½" Extra care that lets us guarantee every Memorex disc to be 100% error-free.

The next time you're buying a floppy disc—or a few hundred of them—just remember this:

It's always better to be safe than sloppy.

For more information on the full line of Memorex quality computer media products, including computer tape, call Memorex U.K. Ltd., 96-104 Church Street, Staines, Middlesex. Tel: 0784 51488

Your Data. When it matters, make it Memorex.™

MEMOREX

There are several things to note when typing Post Mania into your Spectrum.

First, the machine code routine at address 65000 which scrolls one line of the display to the right or left. This is used in the program to move the conveyor belts. Because of this routine, the game should be saved before it is run as an error in the data (lines 8020, 8030) could cause the program to crash.

Second, the graphics in Post Mania are not done in the standard way — instead the character set is redefined and the computer is then told to use the alternative set by poking the system variable 'CHARS' at address 25607-25608. This means that all the characters in the print lines in the listing should be typed in normally.

Line 0 should be ignored in the listing as the computer will not accept it. It is there for copyright reasons and is not necessary to run the game.

POSITIVELY PRIME EVIL...

Steer our hero **TROGG** the cuddly caveman, through 96 reversible levels of dangers — Occasional hails of descending daggers, heat-seeking balloons and the evil **BUNYIP** will cause you deathly problems; But don't worry — your trusty yo-yo and off-screen action(!) will win you points and keep you going.

SCRUBBLy guardians, **HOOTER**, **POGLET** and others will give you a hard time, and the better you are, the nastier and more unexpected the surprises in store.

96 LEVELS

CYCIB

At last, a game all Spectrum owners can
enjoy — 24 exciting screens that will prove
challenging, infuriating and, even worse,
madly addictive!

Sir Lancelot must storm the castle,
undaunted by such dangers as birds,
bouncing balls, dogs, stars (and even
cooking pots with legs?!).

Your task is to collect the various precious
objects scattered throughout the castle — a
task that sounds easier than it is.

Great animation and high resolution make
this the game to beat.

- Arcade/strategy
- 24 screens
- Up to 7 aliens per screen
- Moving stairways
- Suitable for all ages
- 100% machine code
- For any Spectrum

SUITABLE
FOR
ALL
SPECTRUMS

Melbourne House

THE WAITING IS OVER!

The long awaited follow-up to FOOTBALL MANAGER
by KEVIN TOMS is now available

SOFTWARE STAR

Available
NOW for **SPECTRUM 48K** Price
£6.95

SOFTWARE STAR is the NEW game from Kevin Toms, who designed the Software Classic - FOOTBALL MANAGER. SOFTWARE STAR allows you to try your hand at running a successful software company. You have to cope with staff problems,

game launches, advertising, financial problems and more while trying to produce chart topping successful games. One other thing, SOFTWARE STAR has that gripping Addictive quality that all Kevin's games have!

NOW AVAILABLE FOR YOUR COMPUTER!

Make new friends,

Like Dr. Frankenstein, you can now create your very own monsters and aliens. As well as friends and heroes to defeat them.

You can also invent your own games. As simple or as complex as you care to make them. The only real limit is your imagination.

GAMES CREATOR

For the CBM64, the Games Creator comes with a step-by-step manual and three ready-to-play games. Each demonstrates some of the program's exceptional features: shapes, movement, speed, scrolling backgrounds, scoring, music, sound effects and many more.

And you don't have to know any program language to work it! There's only one thing better than playing games. And that's inventing them.

£12.95

and enemies.

GO-SPRITE

A versatile, easy-to-use sprite designer and tester which makes full use of the facilities on the Commodore 64.

Go-Sprite gives you:

- ease of use with icon driven commands
- simple animation of 32 sprites, with 255 frames
- easy handling of multi-coloured sprites
- overlays of up to seven layers

User-friendly Go-Sprite can be operated almost entirely by joystick alone. Lightpen and keyboard control options also included. Speedy loading program £9.95

MIRRORSOFT

SOFTWARE FOR ALL THE FAMILY.

Before him lies the unknown

Hunchback

BY CARL BALL

Quasimodo, the legendary Hunchback of Notre Dame Cathedral, is up to his old tricks of creating havoc for the cathedral guards in an attempt to rescue his sweetheart, the beautiful Esmerelda, who has been kidnapped by the evil Cardinal.

The Hunchback must complete three challenging stages before he can rescue the fair Esmerelda.

In the first level, you must help Quasimodo run along the outer wall of Notre Dame, jumping over the parapets and dodging arrows fired by the guards. In the second level, the cathedral guard assault the poor hunchback with spears and in the final screen you must help him jump over the soldiers guarding Esmerelda's prison cell.

CONTROLS

The ultimate development from

The New Protocol4 interface for the ZX Spectrum brings you game control customising in a way that no other interface can. It accepts all commercially standard joysticks and is compatible with ALL Spectrum software. Operates like fixed option interfaces or can be fully hardware programmed. Infinite flexibility is achieved by the unique "CustomCard" System. CustomCards are easily programmed to suit all types of games. Protocol4 comes with 4 pre-programmed cards allowing operation with Kempston, AGF/Protek, Sinclair joystick 1 and 2 options as well as 4 programmable CustomCards and 10 Quick Reference Programming Cards. Simply clip in programmed card for immediate customised control.

New
Protocol 4
Only £29.95
+ £1.00 p & p

Other exciting features include:

- ★ Automatic 8 direction control
- ★ Guaranteed conflict-free with other peripherals
- ★ Reset Button to clear memory between games
- ★ Fully guaranteed for 18 months
- ★ No power-down programming loss
- ★ Keyboard remains fully operative
- ★ Complete with full instructions

Also from the AGF Hardware range:

- ★ **Programmable Interface** — Ever popular fully hardware programmed joystick interface for ZX81 or Spectrum ... £24.95 + £1.00 p & p.

★ **Interface II** — The best low-cost introduction to joystick control for ZX81 or Spectrum ... £9.95 + £0.50 p & p.

NEW: ★ RamSlot — Adds ROM cartridge software facility to Spectrum programmable joystick interface owners ... £9.95 + £0.50 p & p.

★ **Quickshot Joystick** — Excellent value game controller ... £7.95 + £0.50 p & p

★ **Quickshot II** — Trigger action firing button and unique Auto-Fire ... £10.50 + £0.50 p & p

★ Extra "CustomCards" (5 per pack) ... £3.95 inc p & p

★ Extra "Quick Reference Programming Cards" (10 per pack) ... £0.65 inc p & p

Adventure Extra

Keith Campbell & Co. proudly present another exciting episode of *Adventure Extra* to chase away those post-Christmas blues — and help you out of those *Adventure* doldrums.

93

This issue they've decided to introduce their own rating system for the games reviewed to help you with the agonising decision of which to try. Turn the page to find out exactly why *The Mask of the Sun* from Bröderbund, *Crystal Frog* from Kerian and *Return of the Ring* from Dragon got full marks!

102

Those of you who are in need of a chat turn to this page.

Plus all the up-to-date adventure news revealed! Adventurers in despair — calm down! *The Helpline* is on this page!

104

HAVE AN ADVENTURE THIS CHRISTMAS WITH LEVEL 9

The appearance of a new program from Level 9 is a flag-day for all aspiring adventures and, in my household, a signal for the cat to hide under the bed for the duration against the inevitable moment when I go rampaging through the flat, a wild look in my eyes muttering ferociously about bricking birds nudist beaches and the like. Since *Return to Eden*, the sequel to *Snowball* is out, the cat may be in hiding until Christmas.

You don't need to have played *Snowball* to get into the sequel as ever, there is ample documentation with the tape which in my Commodore 64 version (it is also on the Spectrum, Amstrad and BBC), is turbo-loaded. It starts with you, agent Kim Kimberly, having been framed for sabotaging the colonyship *Snowball*, in a crashed stratolider on the planet Eden. For the moment your mission is to survive the misplaced retribution, by your own people, but life gets very much more complicated than that. Solving these puzzles has nothing to do with luck, you either figure your way out of trouble on Eden, or die there. One major difference between

this and former Level 9 efforts is that the Spectrum and C64 versions have graphics of a very high quality and can be switched off if required. The scope of the vocabulary appears unscathed by this addition.

Even experienced adventurers will probably get fired a few times by the avenging engines of the *Snowball*. Before discovering how to take shelter. But, once that hurdle is passed, the real adventure begins, and it's a joy. From the radioactive distress caused by the engine blast, you progress through a variety of hazards through some high unlikely locations.

I haven't got to that point yet, and so far superhuman willpower has stopped me using the clue sheet provided, but I can't hold out very much longer since I am having what could be lethal communication problems with some robots. Terrific fun, but should carry a mental health warning.

MASK OF THE SUN

The Mask of the Sun is a disc-based Adventure from Broderbund Software, in which you take the role of Mac Steele, a seasoned archaeologist and treasure hunter. On hearing of the theft of your latest discovery by your not-so-esteemed colleague, Francisco Roboff, you go about seeking it out. During a small fracas, you acquire an amulet found by Roboff on one of his earlier digs. I know — two wrongs and all that — but it does make you feel much better!

After a bit of leg-work back at the University, you discover that the amulet may hold the secret of the whereabouts of that most sought-after of legendary artifacts — The Mask of The Sun.

Then disaster strikes — poetic justice, perhaps! While you are trying to unlock the secrets of the amulet, it releases a strange gas. A few days later you wake up to find yourself in a hospital bed. The doctors tell you that your body is undergoing a rapid degeneration. They have no real cure, but have managed to halt temporarily the degeneration process. Listening to the doctors, you realise that you have but one chance for a cure — to find the Mask which is believed to hold the secret of the cure.

Losing no time, you wire your friend, Professor de Perez at the University of Mexico, who tells you of several Aztec ruins that may be possible resting places for the Mask. With little else to go on, you board a plane for Mexico, hoping that he is right and that time is on your side.

The strong plot is not the end of the story, for the graphics and animation used in this Adventure are something else! The travel sequences are good examples of this. Should you climb into a motor vehicle to drive to a new location, instead of just displaying a picture of your destination on arrival, you are treated to five or more screens showing you the view as you move. Pretty good, I thought. In fact, playing this adventure is a bit like taking part in an Indiana Jones movie.

With such good plot and graphics, one would expect the game to have a limited number of locations, but this is not so. Just how big the game is I'm not sure, for I lost count of the number of places I visited when I switched to the fourth disk! Yes, I meant that — this one comes on four disks!

So map-drawing is a must when playing, especially as exits in tunnels and passages change in appearance in the same way as they would in real life.

There are two other features about *Mask of The Sun* that enhance the game. As well as the usual type of text input, there are occasions when

REVIEWS

OUR RATING

This month, due to popular request, Simon, Paul and Keith have included a Personal Rating for each game they have reviewed.

These are not intended to be definitive judgements, but refer more to their personal feelings about the overall enjoyment they got from the game. The enjoyment gained from a particular Adventure is a very subjective thing. Just as a film or book that one person thinks is great, another finds no interest in, so it is with Adventure games.

So if you find, for example, that you always like a game Keith hates, then a low rating from him would be an indication that it might be a good game for you!

the speed of your fingers over the keyboard will decide whether you live or die. Second, there are the red herrings. Most Adventures, I know, have red herrings — but not like these! I'm not going to spoil the game for you by hinting at what they are, but I will tell you that even the most skilled adventurer could find himself totally misled without even realising it!

The Mask of The Sun has set a standard that I think will be difficult to equal, let alone better. However, being an adventurer, I should know better than to say this! I look forward to seeing more from Broderbund Software.

The Mask of The Sun is available for Atari 400/800/XL and Commodore 64 for those of you who care to venture

forth and grapple with it. Good Luck!
Personal rating: 10.

Paul Coppins

SPHINX ADVENTURE

Nowadays there are many versions of the original Colossal Caves adventure and *Sphinx* is Acornsoft's contribution to the collection.

Your goal is to find and collect all the treasure and take it to the Sphinx. On your way, you will encounter a bearded pirate, axe-wielding dwarfs and a rather annoying little rabbit intent on following you everywhere. The way to the Sphinx is full of problems, but all of these can be solved with a bit of logical thinking.

The first thing to strike me, when I started playing, was the time the game takes to reply. Even though faster than most Acornsoft Adventures, it still has a way to go before it can compete with the Level 9 standard. The main reason, of course, is that *Sphinx* is written mostly in Basic.

One major grumble I had was that there is no save-game routine. This means that you have to play the game in one go which could run into hours — a large proportion of this being taken up with the response delay. I dread to think what it would be like on the Electron which is a much slower animal than the BBC!

The game starts off at the top of a mountain, with a road leading north to a building housing the traditional lamp and keys. Surrounding the road is the dreaded forest with unclimbable trees. Gone are the days of black metal rods — in this Adventure the Sorcerer's wand makes a comeback! As well as bridging the gaps, the wand has other purposes and so does the food. The bear (which is sometimes too friendly) will refuse the food, but a certain reptile is quite willing to sample it! Needless to say, it doesn't get it, but it wouldn't say no to a bit of human flesh!

Next, we venture into the land of Oz and the fairy grotto. A gift from the Fairy King will take us back to the Sorcerer's lair. Deposit the treasure in the safe if you know the magic word and then pay (hint) the troll a visit!

After crossing the bridge, prepare to encounter those ghastly mazes! Roam through the colour maze and iron passages, or cross the glacier and get lost in the labyrinth. To get past the elephant, you need the mouse. To get the mouse, you need the cheese. And so on...

Altogether, *Sphinx* is not a bad Adventure. But let's hope Acornsoft think to bring out a machine code version, with a save-game option.

Sphinx is from Acornsoft for the BBC B and costs £9.95 for tape and £11.50 for disk.

Chris Hill

STAINLESS STEEL RAT

Before you attempt to play *Stainless Steel Rat* (Saves The World), you should read the book. I say that without hesitation for, although being fairly well-read in science fiction, I had not sampled the works of Harry Harrison. My first attempt at the game drew a zero all round, so much so that I felt there had to be more here or otherwise why the game?

So I read the book which I thoroughly enjoyed — it is amongst the most readable of science fiction and I found I could not put it down until finished. I then sat down to have another crack at the game, being now familiar with the world of Jim di Griz.

This time I was much more in sympathy with the game — but I'm afraid I still ended up none the wiser, despite continual perseverance.

The opening sequences nicely simulate the frantic opening of the story — you must act quickly or all is lost! In fact, I would say that almost certainly you will have to restart after a very short while when you first start to play.

The problems then begin to appear. Your pace is held back by the method of text display of the location descriptions. This unfolds letter by letter at a pre-ordained reading speed, followed by timed messages (if any) before the prompt appears. The time delay for any command that doesn't change the location is a yawn. In particular, I for inventory causes a timed item-by-item list to be displayed, when just a quick glance at a list is all that is needed.

In *Rat* which can go wrong for the Adventurer many a time, this is a tedious business indeed. It's not the graphics that slow down the action — they are good and instantaneous.

The other problem is that, although now familiar with the book and with my objective in mind, I can go plenty of places but not where I want! I discovered early on that it's no good trying to make a two-dimensional map — another method is needed to map time. My inability to move around at will all boiled down to inadequate knowledge of time-helix operation. I can't operate one, at least, not very efficiently.

Stainless Steel Rat is for the Commodore 64 from Mosaic Publishing and programmed by Shards. It is priced at £9.95.

Personal Rating: 5.

CRYSTAL FROG

It's lucky that good titles don't necessarily mean good games, and bad titles, bad games. If they did, then this game would have rated as terrible!

The *Crystal Frog* is a Quilled game, in which the object is to find "the fabulously valuable crystal frog and return it intact".

The text locations in *Frog* are so long and verbose that it had me imagining I was playing an Infocom game! Most descriptions take about three-quarters of the screen and the prose is so utterly believable that once or twice I thought that I could actually smell an apple in the orchard — an excellent example of what is actually possible using the Quill.

Some of the objects are rather strange. A spade, fur coat and apple seem to be in the right period of time, but what is a gas mask doing here? As I have so far only completed 28% of the game, you will have to bear with me, but I hope to find out soon!

Of all the locations I visited, the three most infuriating are a hut with salt in which, for the life of me, I can't take; a cave with a bear which is driving me insane; and, to top it all, there is a nutcase in the local castle who keeps killing me! The only thing that keeps me going is the knowledge that there is another 75% to play and judging by the first 25% this should be good! I can't wait to delve into the rest of it!

REVIEWS

The game has a very large vocabulary and contains most of the words that I wanted to use. The response speed is very good, but that, of course, is the main advantage of using the Quill. As is usual with Adventure games these days, the HELP command is most unhelpful and I would like to see the publishers offer hint sheets. If they decide to do so, perhaps they could send me one?

Crystal Frog is from Kerian UK Ltd. and available for the 48k Spectrum and Commodore 64. If you have trouble finding it, then send off to Kerian at 29 Gisburn Road, Hessle, Hull. If any game deserves to be a best seller, then this one does!

FRENCH ON THE RUN

Silversoft has recently released a game that it claims combines language tuition and an Adventure format. It does not quite manage it!

The gist of the plot is that you are a British wartime pilot shot down over occupied France. You have enough credentials to pass as a Frenchman and the only thing that can possibly let you down is your knowledge of France and use of French.

So far, so good. You have to make your escape and there are a number of different routes that you can take. The narrative is unfolded letter by letter across the screen, a rather unnecessary piece of dramatisation that slows the whole thing down. Each piece of narrative ends with the player having to provide an answer in French, usually to a question posed in French.

Yes, it's a multiple choice game. For example, when you encounter a Nazi patrol and the interpreter asks you how you got to the area, you answer: J'ai pris:

1. un viell autobus.
2. un autobus vieux.
3. une autobus vieille.
4. une vieille autobus.

You are clearly being tested, rather than playing an Adventure by typing in plain language commands in French. The program tests vocabulary, grammar and knowledge of France, but I am not qualified to comment on its educational value, so I won't. I do feel qualified to comment on its quality as an Adventure and without hesitation I would say zero. That is not to dismiss it as a program, though, for I found it quite fun, especially when I got one question right.

French on the Run is from Silversoft, for the BBC B on disc, priced £9.95.

STEVE JACKSON'S
SWORDMASTER
SERIES

He can rest no longer

RETURN OF THE RING

The Dragon is dead. Long live the Dragon!

At almost the same time as *Dragon Data* has disappeared from the scene, the quality of new *Dragon Adventures* has suddenly risen like a phoenix from the ashes. Scott Adams is releasing his series for the machine and one of the original producers of *Dragon* software, Wintersoft, has come back with a vengeance after a year's absence, with a game fighting to be recognised as one of the classics of all time — *Return of the Ring*.

This game is the sequel to *Ring of Darkness* and, for once, a sequel has proved to be better than the original.

What is the objective? "Guardian of Shedir is defeated. The hordes of the evil sage lie at bay. Now, Ringbearer, wielder of the four rings, must face the greatest challenge — to return the Ring of Darkness to its creators in Ringworld."

As in *Ring of Darkness*, this game starts off in *Dungeon and Dragon* style, with character creation. There is a slight difference here, with a new attribute called *Regeneration*. You have 50 points to distribute amongst the attribute fields and each field must have at least ten. A small hint now — make the *Regenerations* about 15 if you want to get anywhere in this game!

Having designed your character, you must load the main game in from the tape. I called my character *Pink Fairy* and he was a *Dwarf Technician* with 15 points per field. So persona intacta, the game started and I was suddenly thrown into the world of Shedir.

Once out of the regeneration room, I found myself in a 3D maze complex. Hunting around, I found various things, including mutants who could be either friendly or, more to be expected, very unfriendly. Amongst all this were to be found portals to different worlds. By using one of these, you can be transported into almost another *Adventure*, but because of memory limitations some worlds have to be loaded in from tape.

The one world that you **MUST** visit and I urge you to visit first is the *Krell* village — but watch your pockets as the locals are a bunch of thieves! The village is drawn in hi-res, as are most locations. In one of the buildings is *King Cebur* who gives you a mission to obtain the *Hanness* sack. Steal it!

The game is full of these little tasks (little, he says — didn't seem like it at the time!) Once the tasks have all been completed and the *Ring of Time* constructed, you are transported to *Ringworld*. *Ringworld* is a text-only *Adventure* and this too must be loaded in from the tape. If my

REVIEWS

calculations are correct, you have over 90k of game for £10.

The interactive characters are very useful to you, for you cannot solve the game without their help. As in the *Hobbit*, however, some of their movements seem a bit random. Unlikely as it may seem for a *Pink Fairy*, the *Princess Xandra* is my favourite. She certainly seems to be the most useful character but, had I played the game in a different way, then maybe someone else would have been more important to me.

If you enjoy your sleep, then don't buy *Return of the Ring*. If you are an insomniac, like me, then buy it and rejoice in the thought that you are playing the best ever game for the *Dragon*.

Return of the Ring is for the *Dragon* from Wintersoft, priced £10.

Personal Rating: 10.

DOUBLE PACKAGE

There is one thing that you can be sure of when you pick up an *Adventure* for the BBC micro — it hasn't been written using the *Quill*. Whilst that does not necessarily guarantee its quality, it does mean that a great

deal more thought has had to be put into it and the authors felt the extra effort worthwhile. Here is a double package, with two games, one on each side of the cassette.

Ebony Tower is a fairly standard text *Adventure* and, whilst it has some annoying qualities, it has a reasonable plot and is quite playable. The text comes in various colours and the response is fast.

Your mission is to kill a dragon but, before achieving that, quite a number of other problems must be solved in order to find out how.

The setting, initially, is a beach and exploration will lead you to swamp, forest and mountains — hopefully to enlist the help of pixies and avoid the orcs. Is there a use for a ripe banana? How do you get the keys from the snake? These are probably the first two problems to focus your mind on.

The annoying features about the game are a rather ignorant EH? when you try to examine something and a few sudden death actions. The sudden death would not be so bad if it wasn't necessary to reload the data section from tape to restart. However, this is only a short load, taking about half a minute including rewinding the tape.

Xanadu Cottage is written in a completely different style from its tape-mate. Again, it is text-only, but this time rather more neatly formatted and in white only. The response is so fast that it seems to appear before *RETURN* is fully depressed!

This is a treasure gathering *Adventure* which always appeals to me, perhaps because one can usually watch the score mounting up as the treasures are being stashed away! The locations are imaginatively described and in places somewhat reminiscent of *Zork*, although never so verbose.

Moving away from the opening scene, a path down a canyon leads to a fountain, the source of a river and further on the entrance to the caves, where the gatekeeper demands a toll to pass. He will somewhat casually leave behind a lamp for you if you pay your dues — though what good that does is questionable!

Yet another game without the word *EXAMINE* but this time the computer will politely but rather firmly announce that "I don't accept the word *EXAMINE*. By my reckoning, the BBC micro must have a higher percentage of *Adventure* games with no *EXAMINE* command than any other!

Overall, the *Ebony Tower/Xanadu Cottage* cassette offers a couple of entertaining and none too easy *Adventures* and represents a good buy. From *Alligata Software* for the BBC B, priced £7.95.

Personal Rating: 7.

RETURN TO EDEN!

Well, I'm glad I'm not really Kim Kimberley! After all that trouble saving the Snowball from certain doom, what thanks does it get? I say "it" because Kim is a bit of a unisex type, designed, presumably, so that everybody can identify with her. Could be that very few will — know what I mean?

But I digress. After all that trouble saving the Snowball, overcoming waldroids, nightingales and the rest, the colonists aboard repay her by finding her guilty of murder! So there she is, on Eden, having escaped in a Stratoglider and no means of protecting herself against the wrath of the ungrateful colonists! Snowball will take its revenge, by blasting its engines towards the "it-type" Kim.

That, of course, is your first problem. Then you must save the planet Eden from the robots who have made it habitable and are now doing their own thing!

This is the first Level 9 game under their own label that has graphics. I wish it wasn't, for on the Spectrum version that I played, they did nothing to enhance the game. They certainly didn't reach the standard of the graphics in *Erik the Viking*, although they are just as fast in displaying.

I was soon typing "words" — the command that turns them off. I wasn't altogether impressed with the text either — not the content, but the appearance. Level 9 has created their own character set in the image of those computer-readable characters you see at the bottom of cheques. I found them rather painful to read.

So it was with relief that I turned to the Commodore version. In this, the graphics are quicker to display, more attractive and have a "wide screen" look in contrast with the Spectrum's "square screen" pictures. In addition, the text hadn't been messed around and was far more readable!

Once out of danger from the Snowball, your journey takes you through the countryside, with its alien flora and fauna, to save Eden from its robots who have gone slightly bananas. From that, you will probably guess that I haven't yet got very far into the game — you are right! But would you have wanted to wait another couple of months to read about the game??

Return from Eden is littered with new trendy words from Level 9's imaginative but self-explanatory sci-fi vocabulary, such as Tradclads, the (unisex?) costume you find yourself wearing. There are also a number of random messages that tend to get a bit tedious at times, such as "a helicopter gunship clatters overhead". Predictably, perhaps, I would have

preferred no graphics and more variety of text, as even the Commodore graphics do little to enhance the game.

For some reason, nearly everyone has gone off the idea of releasing text-only Adventures any more. This is a pity in the case of Level 9, for they built their excellent reputation on text Adventures. So it seems we purist text adventurers must suffer to accommodate the sales-intensive casual buyer who is to be lured by pretty pictures.

Nevertheless, *Return to Eden* is of a high standard and will, I think, turn out to have the same depth as its fore-runner, *Snowball*.

Return to Eden is available for a wide range of machines and is published by Level 9 Computing at £9.95.

Personal Rating: 8.

Keith Campbell

OPERATION SAFRAS

I played the Dragon version of *Operation Safras* which follows the successful *Pettigrew's Diary*. In fact, *Safras* is not a sequel — quite the reverse, since it describes events before the *Diary*.

Pettigrew has been described as one of the best Adventures ever for the Dragon and Keith even rated it as the best Adventure covered in last January's Adventure supplement! Personally, I have always disagreed with that assessment and therefore viewed *Safras* with some doubts when it arrived.

Operation Safras follows a similar format to the *Diary*, having three parts. Each part has a connection with the other parts, but it is very slight.

The first part is about *Pettigrew*, giving his height, weight and so on. There follows a few scenes, one of which is set in a lift which is filling up with water.

To stop yourself from being

drowned, you must press the right button to open the door. The remaining puzzles in the first section are rather similar.

Next follows the Adventure game. Here, you have to find five agents with the help of an agent locator. The locator shows which agent is nearest to you and how many hours you have in which to find him. If you fail he will end up rather dead!

The Adventure is written in Basic, as are the other parts of *Safras*, and I found it very slow and boring! In fact, it could send an insomniac to sleep!

The third and final part is a collection of challenges to test you. In the first of these, our hero has to get past an axe-wielding giant. This seems to be rather out of place in this modern-day Adventure, but then this is a very disjointed Adventure!

The only thing I liked about this game was the sound effects, but sound alone is not sufficient to make up for the shortcomings. My own feeling is that this so-called Adventure is best left to those with an IQ of about 10!

Operation Safras is for the Dragon 32 and Tandy Colour Computer from Shards Software, priced £7.95. The *Pettigrew Chronicles*, a 2-cassette pack containing the best of *Pettigrew's Diary* and *Operation Safras*, is available for the Commodore 64 and Spectrum for £9.95.

Our new software

makes the most of yours.

By any standards, the Activision Designer's Pencil is a unique piece of software. With it, you can design, draw, plan.

You can draw the world and everything that's in it.

And then set it to music.

You can produce complex designs in no less than sixteen different colours.

You can write and develop your own programs, without having to understand Basic.

You can do all this with a joystick.

But then you've only scratched the surface.

As you use the Pencil, it will reveal the full potential of your computer, in the most entertaining way possible.

£11.99 might be a lot to pay for a pencil.

But not this one.

When you've done zapping the world, rebuild it with the Designer's Pencil.

Its scope is as broad as your own mind.

GET A LAUGH — FIND A JOKE!

You may remember a short while ago I asked you to send in your favourite joke lines from Adventure games. Chris Watts of New Malden suggests talking to the nomad in *Pyramid of Doom* and, in the same game, trying to smoke the tanna leaves. In *Dungeon Adventure*, says Chris, take the octopus into the dark room!

Meanwhile, Mark Grimwood from Sudbury in Suffolk recommends that you dig the grave with the pocket shovel in *Voodoo Castle*, if you want a good laugh.

Going to the other extreme, Geoff Phillips nominates two games for the award of unfunniest Adventure — *The Hobbit* and *Pimania*, any other offers?

A COUPLE OF BOOKS

The educational potential of Adventure games is a subject on which I have touched before. Now a book, *Learning With Adventure Programs* (Melbourne House), has been written especially for teachers. It sets out how an Adventure game, not written with education in mind, can be used in the classroom to help develop many different skills.

The author, Rosetta McLeod, Principal Teacher of English at Linkfield Academy, Aberdeen, takes three games, *The Hobbit*, *Valhalla* and *Snowball*, and describes how she devised work units for them, under the general headings of reading, writing, talking and listening. Map-making, note-taking and the development of creative writing skills are among the many topics introduced in the work units, as well as research projects into the subjects, eg Norse gods, the future of mankind, etc. For each game covered, a detailed work unit is provided. The theme of an Adventure game as the focus for a learning scheme for children of all ages comes over as a very exciting and interesting approach to study.

There is also a chapter on the Quill, in which senior pupils had the task of planning their own Adventure games (so this is where they're all coming from, is it?)

ADVENTURE CHAT

The arcade fans are being converted! Lee Callor of Staines confesses to being a strictly arcade person, but decided to sample the seamier side of computer games by buying an Adventure — *Mystery Fun House*. He solved it in six nights flat and somewhat guiltily admits to actually enjoying it! But he was disappointed that the game didn't take the recommended month! He asked me to suggest something difficult, as he intends to buy more Adventures. So beware, arcade players! Try an Adventure at your peril — you may get hooked on something more powerful than a joystick!

Readers often write to confess to solving a problem, or even completing a game, mere moments after popping their desperate plea for help in the letter box. It somehow seems that the act of giving in relaxes the mind! One such is a certain Paul

(Sweetie-pie) McRoy, that desperado with no family or *Coronation Street* who was struggling against *Pyramid of Doom*. How dare he? Still, for good measure, he says: "Keep up the good word and push the Ed for an extra page and a rise!" I won't be greedy. Paul, I'll just settle for the rise!

Quite a number of Commodore 64 players of *Twin Kingdom Valley* have written to chastise me for my comments about garish graphics in the game. I played the game on a BBC micro and stick by what I said. If more than one version of a game is available, I try to make a point of mentioning which I played for the review. Unfortunately, on this occasion, the line was cut out so that the review would fit the page! Ignore my criticisms of TKV graphics, Commodore owners — from what I've heard, they are a great improvement on those in the BBC version.

Adventure-writing trail outlined here, but it is suggested that a lot can be learned as you go along. You WILL need a BBC or Electron micro for the book to be useful to you, as the programming techniques explained are very specific to BBC Basic.

If you have such a machine and are looking for a book explaining in some depth a technique for Adventure programming, then I can recommend this as logical and easy-to-follow reading.

SCROLLING 3-D!

In reviewing Adventure games I have managed, until now, to steer clear of joysticks. Usually a joystick requirement for an Adventure means that it is a so-called arcade adventure — whatever that term may mean! In such a game, the joystick moves the player over a map, and a touch of the button fires a missile, or effects the picking up of an object. Without text input, a game is not defined as an Adventure in my dictionary!

A merging of text commands and joystick control has appeared in two recent releases for the Commodore 64. Imagine a graphic adventure in which the picture is far too wide to fit on the screen and then superimpose a picture of your puppet on it. To traverse the undisplayed areas of the picture, the joystick moves your

This is a book that can be well recommended to teachers in search of innovative uses for their schools' computers.

There are now many books around on the subject of how to write Adventure games, but one of the best I have come across is *How To Write Adventure Games* for the BBC model B and Electron, by Peter Killworth (Penguin Books, £5.95).

Since the author has been responsible for such successful Adventures as *Philosopher's Quest*, *Countdown to Doom* and the others in the Acornsoft series, his credentials are impeccable.

After a brief introduction about how such games are written, the reader is introduced to a pseudo-Adventure to illustrate the basic idea. Next, the reader graduates to the development of a simple Adventure game and finally goes on to an advanced game which is constructed using a fully explained database generator program.

Whilst reading the book, I discovered why all Peter's games have exits restricted to compass points plus UP and DOWN. It's all a matter of space saving, but in my opinion it does limit the game somewhat.

You will need a fairly good knowledge of BBC Basic to follow the

puppet across the scenery, by scrolling the background to left or right and animating the puppet so he appears to be walking. There is a bit more to it than that, for the graphics have parallax, which means that objects in the foreground appear to move faster than those in the far distance, creating the illusion of 3D.

If you stop joysticking, then you can type in orthodox text commands and get a text/graphic response.

You might expect that this technique makes for a more realistic graphic Adventure. In practice, the reverse is true, because the Adventure map becomes so contrived as to seem completely artificial.

At the limit of your left/right joystick travel, your puppet meets with a seemingly invisible force and a message tells you that he can't go in that direction — despite being in completely open territory! Movement other than left/right is by typed command, causing the puppet to jump to a completely different scene. Thus, instead of an integrated Adventure map, you have a series of layered bands, and the whole thing has a most unrealistic feel to it.

In *Zim Sala Bim*, your puppet is the last able-bodied man left in an Arabian village, following a raid by the Sultan. His task is to go to the Sultan's bedroom and recover the gold. The puppet is in full Arab garb and, judging by his silly walk, I think he must at least have been knocked about a bit by the raiders! His speed of movement is adjustable by hitting a key in the range 1 to 9 and I soon discovered that this parameter also affects the speed at which the computer will accept text input. I eventually decided that 9 was the only playable option — a pity therefore that the default level is 1.

When I took my Arab out for a stroll in the desert, a message told me that there was a pistol present, even though it was not visible. I typed GET PISTOL and he suddenly took it into his head to set off at an alarming pace towards the invisible barrier to the far left. There, I knew, lurked a band of thieves, but I was up the oasis without a paddle, as it were, for the joystick would not respond.

This is a beginner's level Adventure, with music all the way. If you can't stand the incessant drone of

Arabian music, there is always the volume control on your TV as a last resort! The blurb with the game describes it as a totally new Adventure experience, a claim that I found to be true, but it is not one that I would wish to repeat!

However, I did, for *African Safari* is similar in format to *Zim Sala Bim*, also for the Commodore 64 and also from Australia. *Safari* is rather dense compared with *Bim* for any text entered that is not understood simply gets wiped clean — end of output! This leaves the player completely in the dark as to what, if anything, is happening. Other instructions cause the computer to deny the existence of objects when they are plainly visible and reported as being present.

You are an explorer who can't take any objects for you have a bad back. Once this problem is solved, there is a rather tedious sequence that involves joysticking your explorer

miles there and back, via the invisible barrier, to solve the next one. The joystick locations are east/west, but the exits north/south (which must be typed in) are up at the far end. Gives the mind a rest, I suppose, but I found it all rather tedious.

The claim by the publishers "makes the *Hobbit* look like a dwarf" is laughable, unless it is only referring to the bugs. For there is a beauty in this one! After reaching a watery end, my puppet was reincarnated for the replay with an enlarged lower half — he must have got swollen legs from all that running about! His miniature top half sat on his large hips and, as he changed from front to profile view through the joystick, he produced some comic hall-of-mirrors effects!

Zim Sala Bim is for the Commodore 64 from Melbourne House, priced £9.95, and *African Safari* is for the Commodore 64 from Simulated/Interdisc, priced £9.95.

KEN'S EYE!

I have never really thought much of the Artic Adventure series, especially the first four, which tend to have very tortuous verb/noun combinations, like SWITCH SWITCH, POINT SONIC and PUT BRANCH.

There is no doubt, however, that A-D have proved very popular, perhaps because they were among the first Adventures available for the massively popular Spectrum. It has always struck me as strange that E, which is probably the best, seems to have proved the least popular. That could be explained by the far greater competition that it has had to face.

Way back in the March 1983 issue, I reviewed A-D and said I thought they got progressively better. After *Golden Apple* comes — *The Eye of Bain* and this continues the trend. The scenario is written by regular C&VG reader Ken Gossing who has been writing to Helpline since the year 0001 CVG.

Not only is Ken's plot excellent, *Bain* performs well both in program and execution and in the implementation of the plot. It has a split screen, instantaneous display, its own character set that fits more than 32 characters across the screen AND no bugs or spelling/typing errors that I

have yet detected!

I was about to describe *Bain* as a text Adventure until I typed LOOK AROUND, when — lo and behold — I got a picture! There's one for every location, but they just sit there modestly, waiting to be called up!

It took me quite a while to escape the first location and even longer to escape it safely. The latter was because I hadn't used my eyes and the experience alerted my sense as I continued to play.

The setting is Alvania, a desert land, where as the night warrior Taro you must escape with the emerald *Bain*. You start off shackled to a pole in a grass hut with no HELP command worth mentioning. Once on your way, you may well meet up with a nasty nomad (shades of *Pyramid of Doom*) and must survive the desert heat and various other hazards.

Well done, Artic — you've produced a first class Adventure at last. Well done, Ken, for the plot and don't let success stop you writing to the Helpline! Well done, Simon Wadsworth, for some excellent programming!

Eye of the Bain is from Artic Computing for 48k Spectrum and Commodore 64, priced £6.95. I played the Spectrum version.

SPECTRUM

GAMES WORKSHOP

GAMES WORKSHOP is the UK's largest fantasy and adventure games company, with ten years experience behind it. Now we're using our expertise to create the best in computer games, and the first three are **BATTLECARS**, **D-DAY**, and **TOWER OF DESPAIR** - each with over 90K of programming!

BATTLECARS is the deadly sport of the future...arm your battlecar with your chosen weapons, and select your battleground: a gruelling speed circuit or a town centre labyrinth. **BATTLECARS** is a one or two player game of skill, nerve and cunning.

D-DAY is a superb graphic wargame based on the Normandy landings of 1944. Two players take the Allied and German sides, battling through four separate scenarios. **D-DAY** offers an enduring tactical challenge to players tired of simple arcade action.

In **TOWER OF DESPAIR**, Games Workshop has used its ten years of experience in role-playing games to create an outstanding adventure. It includes two entire 48K programs, and a guide containing a history, map, and illustrated clues.

AT LAST... A MAGAZINE GEARED ESPECIALLY FOR THE QL USER. SUPRISINGLY ITS CALLED QL USER.

For the latest information on every QL hardware and software release, turn to QL USER. Every month we review the latest games, educational and business packages, together with program listings, book reviews and your readers' letters. Plus, of course, hints and tips on how to get the most from your QL. If you're a QL user, choose the magazine written exclusively for your machine — QL USER.
Available from all good newsagents.

NEW MICRO GUIDE

PART 2

JUGGLING WITH THE JARGON

- Sound** Sound effects during games can only be as good as the machine is capable of producing.
- Some micros have more than one voice which means that they can make more than one sound at the same time. This is just like the difference between a trumpet and a piano. The number of different notes which can be made is often measured in octaves. One octave is eight notes.
- Text Resolution** Resolution means splitting something into its separate parts. Text resolution is how many letters of numbers you can get on one line on the screen.
- Some micros have different screen modes which means that you can have a choice of 20, 40, 64 or 80 characters per line.
- The higher the resolution, the more characters and the smaller they are which makes them harder to read unless you have a good monitor or an exceptional TV. But word processing programs will need at least 80 characters to give a realistic display.
- Graphics Resolution** You hear a lot about hi-res at the moment. This is short for high resolution graphics and refers to the number of dots over which you can have individual control.
- On some micros the graphics resolution is 672 x 512 which means that there is a total of 344,064 dots on the screen which go to make up the display.
- The higher the resolution, the better the graphics you can produce. But the machine needs somewhere to store all those dots so that it knows which are set to black and which are set to white. This will take up various amounts of the micro's memory.
- Memory** Your computer needs somewhere to store your program as you type it in.
- You've probably noticed that, if you turn off the computer, the program you were typing in will have disappeared when you turn the machine back on.
- This is because your program is held in RAM. This stands for Random Access Memory and it's where all the program and its variables are stored.
- Each time you add a new line to the program, you are changing the contents of the RAM so it needs to be able to cope with this constant changing.
- When you turn on a micro, you get a message on the screen and you are now ready to program in Basic. But surely that message can't be held in RAM otherwise it would be lost each time you turn off the machine? And how does the computer know how to run the Basic language for you to write your programs?
- There's obviously another type of memory which stays the same even if you turn off your computer. This is called ROM and stands for Read Only Memory. This means that you can read it (see what's inside) but you can't write to it (alter it). Its contents are fixed into a chip when the computer is built and they cannot be altered.
- Expansion** Expanding your micro means adding disc drives, printers, modems, extra memory and the like. Some computers will have sockets which you can plug a disc drive or printer straight into. Some will need expensive interfaces to connect the computer so that it can cope with the new device.
- Basic** This is the language in which most home micros are programmed.
- You'll get a manual with your machine which explains a little about the features of that particular version of Basic.
- You can also program in machine code which, although harder to write, will produce programs with a more professional appearance.

All that Christmas money still burning a hole in your pocket? Has that micro that you were promised still not arrived?

This month, we present part two of our guide to the best new micros of 1984. Last time we mentioned the QL, Amstrad, MSX and Enterprise. Now, here's everything you need to know about Commodore's two new machines.

And, in case you missed it, we've reprinted our guide on how to interpret those technical descriptions from the brochure.

COMMODORE 16

Commodore launched the 16 at the same time as the Plus 4.

Learning their lessons from the way that the Vic was sold during the last few months of its life, Commodore is selling the 16 as a starter pack which is aimed at someone buying their first micro.

For £139.99 you get the computer, a Commodore soap-shaped cassette recorder, an introduction to programming in Basic and four free programs. Good value for money if ever I saw it.

And you wonder why they've stopped making the Vic?

The 16 has, not surprisingly, 16k of RAM. From the outside, it looks like a 64 or a Vic, as it uses the same case. The inside is different, though. It uses a new version of Commodore Basic with over 75 commands. Like the Plus 4, there's a choice of 121 colours and standard text display is 25 lines of 40 characters.

Output connectors include connection for a standard monitor. Also, there's a link for 22 joysticks, ROM cartridges and a cassette interface is also included. A serial port is provided, but note that Commodore's idea of a serial port doesn't mean that it's a normal RS232. So don't think that a modem will plug straight in.

Sound is provided, with two voices. A connection on the back of the machine allows you to take out the sound and play it through your hi fi.

The Commodore 16, aimed at first time buyers.

There's a choice of nine volume levels.

A useful thought by Commodore's designers provided a "help" key. If you get an error on a Basic line when you're programming, a touch of the help key will tell you where you're going wrong.

Included in the starter kit are four programs. One is called the *Rolf Harris Picture Builder* and is a building block approach to art.

The idea is that you guide a cursor over a selection of predefined graphic shapes. Then, use the same method to choose a colour and its shade and just position it on the screen wherever you want. You can have a paint option, which lets you draw lines using any of those shapes.

There's very little connection with Rolf Harris in this program. In fact, it was written by Paul Jay who has written a few games for *C&VG* in his time.

Also included in the package deal is *Starter Chess* which will teach you to play the game even if you can't tell a Knight from a Bishop.

Punchy is an arcade game based on Punch & Judy. You have to guide the Policeman across a stage to rescue Judy while avoiding such things as custard pies and rotten tomatoes.

Last of the free gifts is *XZA* which is a 140-screen shoot up.

COMMODORE PLUS 4

Launched as a direct competitor to the QL, the Commodore Plus 4 is one of the newest micros.

For £299.99 you get a machine with 64k of RAM. 4k of this is used by the machine, though, so the largest Basic program that it can hold is 60k, which should be more than enough.

There are four built-in programs which are stored in ROM and are called at the touch of a button. These handle word processing, graphs, data filing and a spreadsheet. The four programs are held together in a 32k ROM which means that, at an average of just 8k each, they are nowhere near as powerful as their QL counterparts.

One excellent feature, though, is that you can split the screen into two sections and run two of the built-in programs at the same time on different parts of the screen!

All four programs can exchange data between them, so once you have entered the figures on your spreadsheet, for example, you can load them into the graph drawing program.

Screen display is 25 lines of 40 characters which just isn't enough for a word processor.

The text scrolls across the screen as you write it and, if you use the cursor keys, you can see everything you've written. But this is tedious if

you need to refer to previous paragraphs in a letter or essay, for example.

Unlike the QL, the keyboard of the Plus 4 is quite good. Cursor control is by a cluster of four arrow-shaped keys which point in the appropriate direction.

Text resolution is 40 characters and 25 lines, the same as the Commodore 64. There's a choice of 15 colours which can be in any of eight levels of brightness. Add a "black" colour to this list and you have 121 different shades or colours to choose from. And they can all be on screen at once. I saw this demonstrated at the launch of the micro and it looked like

a colour chart from a paint brochure.

The Plus 4 has two joystick sockets which will take Commodore's new "advanced" controllers. There's also a connection there for ROM software cartridges.

There's a user port for connecting extra peripherals like, I suspect, a CompuNet modem and a serial port for Commodore's newer version of the extremely slow 1541 disc drive.

A cassette interface is included. The micro has two sound voices and, in addition to running software specially written for it, the Plus 4 will also run any software written for Commodore's other new baby, the Commodore 16.

The Commodore Plus 4, a direct competitor to the QL?

SO WHAT SHALL I BUY?

This is the hardest question of all.

The first thing you must ask yourself if you're after a micro is whether you're sure you want one. If you do, decide how much you want to pay. It's not worth spending a fortune for one of the best machines available if you're new to computing.

Best start with something cheap like a Spectrum or even a second hand ZX81. If you decide that computing's not for you, then you've not wasted too much money and you can write it off to experience.

Next, decide what you're going to use the computer for. If you just want a games machine, try to find one which has lots of games available for it. If you'd rather program it yourself, find a computer which there are lots of books about. And call the company to check if there's a programmer's technical guide. There should be one for the QL shortly which will cost around £25.

If your friend has an MSX micro, you may also consider buying one. You can then lend each other games and peripherals.

If you don't have a spare TV to use with your computer then get something like the Amstrad which comes with its own monitor.

So you see, every micro has its own good and bad points. Think very carefully and look through all the micro magazines first. Then you're bound to make the right choice.

MICROMANIA, 14 LOWER HILL RD., EPSOM, SURREY KT19 8LT

MANIC MINER is available on Spectrum, Amstrad, BBC, Dragon, CBM 64, Oric/Atmos, MSX.

Miner Willy, while prospecting down Serbiton, one day stumbles upon an ancient, long forgotten mine shaft. On further exploration, he finds evidence of a lost civilisation far superior to our own, which used automation to dig deep into the Earth's core to supply the essential raw materials for their advanced industry. After centuries of peace and prosperity, the civilisation was torn apart by war, and lapsed into a long dark age, shrouding their industry and machines. Nobody, however, thought to tell the mine robots to stop working, and through countless years they had steadily accumulated a huge stockpile of valuable metals and minerals, and Miner Willy realises that he now has the opportunity to make his fortune by finding the underground mine. In order to move to the next chamber, you must collect all the flashing keys in the room while avoiding nasties like Poisonous Pussies and Spiders and Slime, and worst of all, Manic Mining Robots. When you have all the keys, you can enter the portal which will now be flashing. The game ends when you have been 'got' or fallen heavily three times.

The above screens are from the BBC version.

SOFTWARE PROJECTS

Software Projects Limited, Bearbrand Complex, Allerton Road, Woolton, Liverpool L25 7SF. Telephone: 051-428 9393 (4 lines). Telex: 627520.

Miner Willy, intrepid explorer and sous-chef extraordinaire, has been reaping the benefits of his fortunate discovery in Surlinton. He has a yacht, a cliff-top mansion, an Italian housekeeper and a French cook, and hundreds of new found friends who really know how to enjoy themselves at a party. His housekeeper, Marie, however, takes a very dim view of all his revelry, and finally after a particularly hysterical throw she puts her foot down. When the last of the lovin' disappears down the drive in his Aston Martin, all Willy can think about is crashing out in his four-poster. But Marie won't let him into his room until all the discarded glasses and bottles have been cleared away. Can you help Willy out of his dilemma? He hasn't explored his mansion properly yet (it is a large place and he has been very busy) and there are some very strange things going on in the farther recesses of the house (I wonder what the last owner was doing in his laboratory the night he disappeared). You should manage O.K. though you will probably find some loonies have been up on the roof and I would check down the road and on the beach if I was you. Good luck and don't worry, all you can lose in this game is sleep.

JET SET WILLY is available on Spectrum, Amstrad, CBM, MSX.

Can Thor save Cate Chick from the hungry dinosaurs? Only you can help. At first he only has to jump rocks and holes. Then he must jump and duck, climb slowly and carefully, to avoid the legs and low hanging tree limbs in the Petrified Forest. The only way Thor can get across the river is to lay on the turtles' backs. These turtles sometimes get tired and submerge at the wrong moment, much to Thor's dismay! To add to Thor's difficulties, his arch-enemy Fat Fred is waiting on the other side to ambush him. If Thor's timing is good, the Doobie Bird is overhead, the prehistoric bird will pick him up and carry him across!

Thor must build up plenty of speed during his downhill run before the cliff. Timing is crucial, too. If Thor's balance is off or he is too slow he will crash into the ravine or the face of the cliff. Once over the cliff, Thor faces his most difficult challenge: the volcanic eruption. In addition to the earthquakes on the ground, he is showered with boulders from the sky.

Once again Thor must cross the river on the turtles' backs. Then, at last, he must face the dinosaurs! If Thor can get past the dinosaurs and into the cave, he has only a short way to go to rescue Cate Chick. On his way, Thor must duck under stalagmites and jump over stalagmites to avoid crashing.

If Thor does crash, don't worry: he has five wheels. But True Love is calling him, so use all your agility and cunning to help him rescue Cate Chick!

TORNADO LOW LEVEL

A couple of weeks ago, we sent our resident games expert, Professor Video, off on a little holiday. He thought he was going somewhere really exotic when he arrived at C&VG's own private airstrip at a secret location somewhere on the South Coast. He started having a few misgivings when he showed him the aircraft we wanted him to use, a high powered Tornado swing-wing jet. He was even more upset when he discovered he was going to be the pilot! Anyway we finally calmed him down enough to ask him very nicely to bring you some tips on a game that's been riding high in the C&VG/Daily Mirror charts throughout the year, *Tornado Low Level*. Ace map maker Aonghas de Barra has sharpened up his pencils to bring you a special TLL map — invaluable when you sit down to play the game. He also gave our Prof. a few tips on almsmanship too. So strap yourself in and prepare for take off!

This brilliant game is the work of Tosta Panayil, the author of all Vortex Software's games. He is currently working on TLL 2 — we can't wait to see it. Meanwhile here are a few hints and tips which should help you earn your wings.

The basic idea is fairly simple. You must get your Tornado airborne, search for targets and destroy them. Nothing to it, you say. Think again!

You must fly directly over the base to destroy it with your sonic boom. You also have to keep an eye out for obstacles like trees and power lines, watch your fuel supply and complete the mission within a time limit.

The screen shows essential instrumentation, like the fuel gauge, an altimeter — which also tells you how far you are **BELOW** sea level — an indicator which shows you how many bases you have destroyed, plus the time-clock.

The top right hand corner of the screen is reserved for a miniature map which scrolls as you move and shows the target bases as bright white dots. Below this are your status indicators.

The remainder of the screen is taken up with a bird's eye view of your jet

speeding across the countryside.

The best thing to do before attempting to clear any level is to practise take-off and landing. Essential when you come to think about it!

Incidentally, landing is easier, if you approach the runway from the east. When approaching from the west, a tree bars the way and prevents a nice gradual descent. If you come in from this direction, you may have to attempt a rapid descent after clearing the tree. There's only a short distance to play with after the tree is out of the way. This is why so many TLL pilots have ended up explaining why their multi-million pound aircraft is a smoking wreck on the runway!

Once you've mastered take-off and landing procedures, you'll be well prepared to start a proper game.

The map displayed at the start of each game can only be viewed while your jet is on the runway — and that's where the C&VG TLL map comes in handy. More details about that elsewhere.

Your jet is also refuelled on the ground — so you'll need to land after each sortie to get tanked-up again!

The Tornado is a swing-wing jet and one of the fascinating features of TLL is being able to control the wings. Sweep them back for supersonic flight, forward for

normal speeds. Flying at supersonic speeds obviously drains your fuel supply rapidly.

Landing and take off **MUST** be made at normal speed. You can also destroy bases by flying over them at normal speed.

To destroy a base — first locate your target! Then begin slowly circling above it at normal speed and altitude. Alter your position until the shadow of your Tornado falls over the centre of the target.

Next slowly descend holding your circling pattern around the base. When you are low enough, your sweep over the base will destroy it. The lower you are, the higher the score.

Keep circling while you gain altitude again and then

set off in search of your next objective. Or fly back to the runway to replenish your fuel and check out the map.

Once you have destroyed all the bases on one level, you must land to be automatically transported to the next.

As you progress through the levels, the game gets progressively more difficult. Difficulty levels are judged by the number of bases in the sea as you are operating in a small area and have to watch out for cliffs.

Bridges and electricity wires should be avoided at all costs if you are attempting a high score. But they are great fun to fly under!

USE C&VG'S EXCLUSIVE TORNADO LOW LEVEL RADAR MAP TO HELP YOU FIND THOSE TARGETS!

One last tip. Don't leave your landings for fuel too late. But if you do — don't despair if you run out during a descent toward the runway. If you centre the jet over the runway as it begins to come down, it may just touch down before you are in danger of overshooting your home base.

With the aid of Aonghas' TLL map you should now all be ready to take off into the wide blue yonder. Happy landings!

TTL COUNTERS

We've provided you with some counters to help you make the most of your *C&VG TTL* map. All you have to do is cut out the strip from this page, paste it on a bit of thin card and cut around the counters with a sharp pair of scissors. If you don't want to cut up your magazine, you could always use coins or plastic counters. Then, at the start of each game, take a look at the map displayed on the screen and, using your counters, mark the positions of all the bases on the *C&VG* map. Now you have a ready made radar display of the game area and you don't have to land to view it again. Great eh? Once you've hit a target, simply remove the counter from the map.

DON'T
LEAVE YOUR
LANDINGS
TO LATE!

The Activision Eight.

Pitfall Harry has to recover the priceless Raj Diamond from the lost caverns. But there is a small matter of poisonous frogs, Albino Scorpions, Vampire Bats, Electric Eels. Need we go on?

Running on Commodore 64, MSX, and Spectrum

Miners are trapped deep underground. Threatened by molten lava, poisonous bats, snakes, spiders. You alone in the person of Rodenck Hero - Helicopter Emergency Rescue Operation - can help.

Doomdark's Revenge

Part 2

THE RULES

In this episode of Doomdark's Revenge, you take the part of Tarithel the Dreamer. To play you will need one six-sided die, a pencil and an eraser. You should also familiarise yourself with these simple rules:

BATTLES

Icemark is a savage land. If you are obliged to fight, roll the die against the SKILL factor of Tarithel or her opponent. If the number rolled is equal to or less than the SKILL factor, the attack is successful. The character's weapon (in Tarithel's case a dagger) causes damage to be deducted from an opponent's

STAMINA: If the number rolled the greater than the character's SKILL the attack fails. When a character's STAMINA falls to zero they die.

FOOD

During the adventure Tarithel will need to consume food or risk losing STAMINA. Tarithel begins the adventure with no food. However, you will note three boxes in which to "store" food. When some is offered simply tick the required number of boxes. You will be told when to eat food.

SPELLS

Tarithel carries with her three wooden rune symbols, each stores one spell. During the adventure you may decide that Tarithel casts one of these spells. Simply choose a spell and strike it off the Character Chart. Each spell may only be cast once.

MOON: When cast this spell deepens and multiplies shadows, confusing enemies.

SUN: When cast this spell intensifies whatever light is available blinding enemies.

FALCON: When cast this spell enables Tarithel to command the aid of wild beasts.

SCORING

To score this adventure give yourself 10 points for every point of STAMINA remaining to Tarithel when she reaches Alazorne. Then deduct 10 points for every spell consumed during the adventure. What did

The Kingdom of Icemark

In December's issue you may have led Luxor the Moonprince across Midnight to the Icegates. Now it's time to lead Tarithel, Morkin's friend through the savage land of Icemark to the pit of Alazorne where Morkin lies captive.

At the end of part three, we will ask you three questions relating to the Doomdark quest. The first question was at the end of part one in December's issue. The second is featured here. Keep both answers till the third issue.

THE STORY SO FAR...

Shareth the Heartstealer, Doomdark's evil daughter, has kidnapped Morkin by foul sorcery. Her objective is to lure Luxor the Moonprince into her domain, the savage Icemark. Luxor and one thousand warriors of the Free have travelled across Midnight to a rendezvous with Rorthron the Wise. Tarithel the Dreamer, Morkin's friend, has tracked Morkin alone into Icemark. This episode opens with Tarithel somewhere within the great forest of the Kingdom of Icemark's Fey. You must guide her safely through the Icemark on a quest to discover Morkin's prison.

Tarithel score?	
70+	Amazing
50-70	Excellent
20-50	Average
10-20	Could do better
10	just alive!

CHARACTER CHART

Tarithel the Dreamer

3

FOOD () () ()

TO BEGIN

Turn to section one and follow instructions.

1) Tarithel, stands in a glade of trees before dawn. Her eyes are closed and she sways gently in the still night air. She works at the Fey skill of divination, listening, tasting, smelling, watching the shivering web of fate. Frozen pine needles, spilt by the headlong rush of a rider litter the glade. The hard-packed snow is branded with the faint mark of a horse's hooves. Old north wind whispers his tale through the trees and Tarithel knows that Morkin has gone North. She falls from her trance exhausted, strike one point from her Stamina. Now you are Tarithel. Guide her to Morkin across the cold wastes of the Icemark. Turn to 2.

2) You leave the glade and move off into the trees. You hide in the shadow of a tree and peer ahead. No further sounds disturb the night, but you smell the resin scent of a camp fire. You are cold and hungry.

• Will you approach the campfire? Turn to 11.

• Will your skirt the camp and head on alone through the wilderness? Turn to 15.

• Will you believe the big fellow? Turn to 18.

• Will you cast magic at him? Choose a spell then delete it from your Character Chart and turn to 30.

• Or will you don the cloak of Invisibility? Turn to 13.

3) The tower stands in the midst of a frozen world, yet the land about its base flourishes as if in the midst of summer. A strange mirrored contraption spins atop the tower. Somehow this machine focuses and intensifies the weak power of Icemark's sun.

• Will you enter the tower and seek out its inhabitants? Turn to 19.

• Or will you spend the night in one of the outbuildings? Turn to 32.

4) A brass pentangle lies on the

ground where the wolf stood. You pick the artifact up and examine it. A mirror glints in the centre and the face of a beautiful but cruel looking woman materialises there. "Rest for now daughter of Dreams" She says. "We shall meet again at Alazorne." Then the glass shatters.

Content that you will not be troubled again during the night you fall into a deep slumber. Turn to 26.

5) Not far from the ancient tower you see, in the distance, the craggy peaks of mountains. You discover a cavern but before you enter you hear voices from within.

• Will you hide? Turn to 22.

• Will you cast a spell into the cave? Choose your spell then strike it from your Character Chart. Now turn to 8.

• Will you test the cloak of invisibility? Turn to 25.

6) The wolf stalks purposefully towards you. Its jaw hangs slack and spittle drools upon the ground. Unnatural eyes burn red, then the wolf pounces. Roll against your Skill if you succeed turn to 16. If you fail turn to 28.

7) If you cast Falcon or Moon your magic fails for this is a sorcerous beast. You must fight with your dagger. Turn to 6.

If you cast Sun the sacred tree trunks of the Fey henge burn bright with magic fire. The wolf yelps and then dissolves into thin air. Turn to 4.

8) If you cast the spells Moon or Falcon they have no effect here. Instead you find yourself sinking into a stupor and realise you have become spellbound. Turn to 33.

If you cast Sun the fire which burns within flares up. Two figures—an old man and a dwarf dressed in black, curse and cover their eyes. You run away into the night and seek shelter elsewhere. The night is long and cold. Unless you have food you will lose another point of Stamina. Turn to 10.

9) You drive your dagger Eagle's Claw in between the wizard's ancient ribs. "Die vile one!" you hiss. The corpse crashes forward into the fire and the dwarf leaps to his feet screaming: "I told you this place was the haunt of evil spirits." Then he disappears into the night.

You spend the night unmolested in the cave and eat some of the dwarf's food. You recover 1 point of Stamina. Turn to 10.

10) On the second day of your journey through the mountains you encounter a hill giant. He stands as tall as the tower of the wise and his grin reveals rows of sharpened teeth. "A daughter of the Fey. Giants like Fey. I take you through Iron Hills. I Thungrom."

11) Cautiously, you slip through the undergrowth and see a man tending his horse. He is dressed in the bulky skins of a snow-ox, a brazen helmet

rests jauntily on his head and a great axe swings from his waist. You have encountered an Ice barbarian. Turn to 20.

12) Zorgo turns slowly round and eyes you up and down. "A Fey treading the cold forest before dawn. What do you quest for? Come, you shall share my breakfast and tell me of this forest's secrets."

Together the two of you sit round the campfire. You tell him of your quest and he tells you that he hunts the legendary Targa bird, a giant flightless beast said to haunt the forest. The food refreshes you. Add 1 point of Stamina.

• Will you ask Zorgo if he has seen Morkin? Turn to 31.

• Or ask him for general news of this land? Turn to 34.

13) You don the cloak and warily circle the giant's vast bulk. He bends over the spot where you disappeared and prods at the ground with an uprooted tree trunk. You struggle on through the mountains. Turn to 29.

ELECTRONICS &
COMPUTING

THE NEW ATARI 800

EVERYTHING YOU WANT FROM A HOME COMPUTER

- ATARI 800X, 800LX, £126.** The Atari 800X, has many facilities and includes such advanced specifications that you will be amazed by its performance. At the new reduced price of only £139 inc. VAT for a full specification 64K computer with a proper full stroke keyboard we believe that the 800X will be better than Compaq Atari with the competition, just look at these specifications:
 - COLOUR CAPABILITY:** 16 colours and 16 shades giving 256 different colours. All of the 256 colours can be displayed at the same time.
 - OPERATING SYSTEM:** 240 ROM including Atari Basic, programming language and a self modifying text program.
 - KEYBOARD:** Full stroke design with 80 keys including help key and 4 special function keys. Interconnect character set and 26 graphics keys.
 - SOUND:** 4 independent sound channels with 16 levels of playing music, access a 22 octave range or a wide variety of special sound effects. (Additional programming can achieve an octave range of up to nine octaves).
 - DISPLAY:** 17.1 cm monochrome and dual colour. Up to 200-192 resolution. Maximum text display 24 lines by 40 columns.
 - SPECIAL ATARI INTEGRATED CIRCUITS:** CIA for parallel and serial data. Atari for sound and control ports. Atari for video control and I/O input/output.
 - CPU:** 6502C microprocessor. 654 microtiming clock and a clock speed of 1.79 MHz.
 - EXTENDED GRAPHICS FUNCTION:** High resolution graphics. Multi-colour character set. Software screen painting. Multiple refined character sets. Player missile to control graphics. Changeable colour registers. Smooth character movement. Smooth colour refinement features. Player missile to control graphics. Full screen scrolling. Changeable colour registers. Smooth character movement. Smooth colour refinement features.
 - PROGRAMMING FEATURES:** Atari's Atari Basic programming language supports: player, style and 128 lines at least 2 line range, up to 128 lines. The new key will provide solid control and many features with certain software. Full on screen editing is available as well as syntax checking on entry.
 - INPUT/OUTPUT:** Internal connector for expansion with memory and graphics. Composite video output. Peripheral port for direct connection to Atari standard peripherals. Software cartridge port is included as well as 2 system controller ports.
 - SOFTWARE:** Over 1300 items of software are available including self teaching programs with unique video over the range of programs includes Education, Sports, Management & Programming aids. There is also ATX, Atari Program Exchange and all source Atari's famous software library. Software now at only £9.95. In addition there is a host of support software available from specialist Atari magazines like Atari and Atari magazine from over 15 Atari bookstores.
- ATARI 400 16K GAMES MACHINE, £29.** We have several Atari 400 games console computers with 16K RAM. The price of £29 for a reconditioned model or £39 for a new machine. Both come with £20 for a new machine. The Atari 400 can play all 800X ROM cartridge games and is upgradeable to 48K RAM. Computer upgrade with Basic Programming Kit (B32) optional extra.
- ATARI 1050 PROGRAM RECORDER - £24.** For low cost storage and retrieval capability. Data transmission 800 baud. Storage capacity 100K bytes on a 5 1/4 inch cassette. Track configuration four tracks, two channels (digital and audio). Auto record/playback/erase control. Unique soundthrough facility. Built in accidental erasure prevention, automatic stop and 5 digit tape counter.
- ATARI 1650 DUAL DENSITY DISK DRIVE - £116.55.** Disk rotating 127K, randomly accessible bytes provide both expansion and flexibility for your 400/800 or XL systems with new helpful DOS 3. All customers who purchase a Disk Drive from Silica Shop will be automatically given a FREE set of 100 programs on 5 Disk recorded on both sides.
- ATARI 1650 COLOUR PRINTER - £99.** Printer and Plotter with four colour graphic print capability. 40 column width printing of 10 characters per inch. Can print 5, 10 and 20 characters per inch. 84 character sizes. Prints text in 4 directions. Choice of line type.
- ATARI 1027 LETTER QUALITY PRINTER - £24.** For word processing in professional type. Print speed of 20 characters per second.
- ATARI TOUCH TABLET - £49.** Enables you to draw and paint pictures on your TV screen with touch of a stylus.
- ATARI TRACK BALL CONTROLLER - £16.95.** Enables cursor movement in any direction and adds accuracy to your games.
- ATARI SUPER CONTROLLER - £36.95.** The ultimate joystick with double fire buttons to give you a greater competitive edge in your games.

SILICA SHOP ARE THE No1 ATARI SPECIALIST

Silica Shop are now firmly established as the No 1 Atari specialist order and wholesale specialist in the UK. We already offer our services to over 120,000 customers, 10,000 of whom have purchased Atari Home Computers. Because we specialise and have a turnover of £15 million, we are able to keep prices low by bulk purchase. This one of our 45 staff and we will be glad to be of service to you. Complete the coupon below and we will send you our Atari back with our 16 page price list and XL colour catalogue.

EXTENDED TWO YEAR GUARANTEE. We are an Atari Service Centre. Also a service and repair Atari equipment and have added a 12 month guarantee to the one offered by Atari, giving you a total of 2 year guarantee on your new XL computer.

SPECIALIST SUPPORT. Our technical staff are always available on the telephone to help and advise you. We maintain a huge stock of every Atari computer item available in the UK, and we stock over 15 Atari books and manuals.

AFTER SALES SERVICE. When you purchase your equipment from Silica, your name will be automatically added to our mailing list. You will then receive price lists, newsletters and details of new releases and developments. We will also specialise in all other services that are available to Silica Atari Computer Owners.

LOW PRICES! Our prices include VAT and are extremely competitive. We will continually match any lower price offered by our competitors.

FREE COMPUTER OWNERS CLUB! This is open to all Atari computer owners irrespective of where you purchased your equipment. Membership is FREE and entitles you to receive business giving details of new releases and developments. Send now for your FREE information pack, price list & colour catalogue.

REMITTANCE: The easiest can be made by cheque or credit card. We also offer credit facilities on a 30 day basis. Please send us a letter to request a 30 DAY DELIVERY FREE. All goods dispatched from Silica Shop are normally sent by first class post or parcel post FREE OF CHARGE. As a special introductory offer for a limited period only, we will be sending all Computers and Disk Drives by a next day courier delivery service at our own expense.

So fill in the coupon below with a literature, enquiry or order and begin to experience a specialist Atari service that is second to none.

Micronet 800.

Stretching the mind of your micro far beyond its limits.

Micro evolution continues with this unique communications, information and software system. Set on our mainframes nationwide.

Includes 30,000 pages and access to Prestel™ with its full range of services.

A tremendous Communications section that networks you to thousands of other members across the country. Send and receive electronic messages and graphics at a touch of a button.

And there's the Chatline service. Swapshop and Teleshopping.

Check with daily updates on the very latest computer news.

Micronet also has its own huge facts data base.

And a choice of up-to-the-minute software to download absolutely free.

For only £13 a quarter and just a local telephone call whenever you want to connect up (that's only 22p per half hour at cheap rates) you could be part of Micronet.

The only accessory you need is a Modem.

A small price to pay to join the other visionaries on this exciting new system.

Fill in the coupon for more details and send to Micronet 800, Durrant House, 8 Herbal Hill, London EC1R 5EJ.

But be warned, Micronet 800's features are almost limitless and constantly updating. So maybe you'd be better to call in at Laskys, John Lewis, main Boots or your local Micronet 800 Action Station.

To feast your eyes on all the amazing things it can do.

For MICRONET 800, Durrant House, 8 Herbal Hill, London EC1R 5EJ. Telephone 01 278 5143. Please send me the full facts about Micronet 800.

Sevenoaks.

14) The spell Falcon enables you to establish a mind link with the bats. You will them to leave their perches and harry the wizard and dwarf. Instantly the cave is filled with swift diving black bodies. "What sorcery is this?" Cries the wizard. "Come Bolbog we shall find shelter elsewhere." Turn to 10.

15) With caution you press on through the forest.

16) You dodge the wolf and stab at its back as it passes. The creature yelps with pain then turns to face you. The Wolf has a Stamina of 7 and a Skill of 3. Its teeth and claws will cause you 1 point of damage if they catch you. Now you must fight to the death. You have first blow.

• If you are slain you become a tasty morsel for the wolf

• If you survive turn to 4.

17) When the moon rises you explore the henge. It is constructed from 12 great tree trunks arranged in a circle and each are carved with Fey runes. You settle down for the night certain that you dwell within a place sacred to your people. Yet your

Talorthane the Giant

sleep is troubled by a strange sense of doom. Turn to 23.

18) The giant lowers an enormous, grubby and calloused hand. "Come little Fey, ride on Thungrom's shoulder."

All day long the giant strides through the Iron Hills. He is an amiable fellow but smells quite appalling.

As night falls Thungrom deposits you before an ancient henge. Then he bids you well and strides back to the mountains. You are tired but have lost no Stamina today. Turn to 17.

19) You enter the tower and climb a stone staircase to a lofty chamber. An old man sits painting at a window, he rises and presents to you a table piled high with food. "These are the fruits of summer, no doubt unknown to you. Eat your fill and stuff your pouch — you will need sustenance on your journey. I am Albedius of Khare. I saw Rorthron in a dream. He told me of your quest and bids me say that Morkin languishes in the pit of Alazome. That place lies beyond the Iron Hills to the north."

Your meal finished, the old man leads you to a comfortable lodging. "Sleep well," he says "Rise with the sun and march north. Take with you this cloak — it will keep you warm and confers upon its wearer the boon of invisibility. Use it carefully, the charm works but once."

You sleep well and awake refreshed. You have recovered 1 point of Stamina and have food sufficient to recover 3 more points should you need to. (Tick the three boxes on your Character Chart). Now turn to 5.

20) Boldly you step out into the clearing. The barbarian's back visibly stiffens but he carries on saddling his horse. Without turning he says: "Who disturbs the labour of Zorgo the Wanderer? If you seek food you are welcome. If you plan mischief step no further, for I will cleave your head from your shoulders ere your foot falls. Speak stranger!"

• Will you draw your dagger Eagle's Claw under your cloak, in case this barbarian attacks you? Turn to 27.

• Or will you tell him that you come in peace? Turn to 12.

21) On the second day of your journey through the mountains you travel with your companions Barzai and Bolbog. At mid-day you encounter a hill giant. As soon as he spots your party he growls with rage and hoists up a massive boulder. Then he hurls the missile towards you. Barzai casts some magic and both he and Bolbog disappear. You are obliged to dodge the boulder. Roll against your Skill. If you fail your quest ends abruptly. If you succeed the boulder misses.

A broad grin breaks across the

Luxer the Moonprince

giants face revealing rows of sharpened teeth. "Wizard bad fellow. No friend to Fey or giants. You come with me. I am Thungrom."

• Will you believe him? Turn to 18.

• Will you cast a spell. Make a choice and delete it from your Character then turn to 30.

• Or will you don the cloak of invisibility? Turn to 13.

22) You conceal yourself behind a boulder and watch the cavern's gaping maw. It must be very cold for soon you find your legs turning numb. Then your eyelids become heavy and you fall into a stupor. As you lose consciousness you realise you have been rendered spellbound. Turn to 33.

23) Suddenly the still night air is split by the howl of a wolf. You gather your possessions and crouch in the shadow of one of the magic stumps. Then you spy a giant wolf stealthily approaching the far side of the henge. It stops beyond the tree trunks and peers in at you. A rasping female voice speaks out of its jaws:

"Daughter of Dreams I see you cowering there. Come out of the shadow and I will eat you." Then the creature leaps into the henge.

• Will you fight the wolf with your dagger? Turn to 6.

• Will you cast a spell? Make your choice, strike it from your Character and turn to 7.

• Will you don the cloak of invisibility? Turn to 34.

24) You don the invisible cloak but the wolf merely chuckles: "Such puny magic will not help thee, prepare to die."

• You must fight the wolf with your dagger. Turn to 6.

• Or cast a spell. Make your choice, strike it from your Character Chart

then turn to 7.

25) You don the cloak of invisibility and cautiously enter the cave. Two figures are seated around a fire. One is an old man dressed in cloths embroidered with magical symbols. The other is an evil looking dwarf dressed in black.

The old man speaks first: "Soon my dear Bolbog we will reach the pit of Alazorne. There Morkin, son of Luxor, lies in chains. I shall work my foulest sorcery on the Ice Empress' behalf and your dear comrade will lead your dark folk to pit the land thereabouts and swallow up Luxor's army."

You appear to have stumbled upon an evil council of war. Will you slay the evil wizard? Turn to 9.

• Or cast the spell Falcon upon the many bats who hang from the cave's ceiling? Turn to 14.

26) At dawn you are shaken awake by a rough hand. You gaze up into the face of a weary Fey warrior. "I am Temeril of Imorthorn, why do you trespass upon the sacred henge?"

You introduce yourself and explain

that you seek Morkin. Temeril replies: "Morkin lies in the dungeons beneath Alazorne. We have scouted the place for Lord Luxor who rides this way with an army of the Free and the Fey."

You ask Temeril to help you release Morkin before Luxor arrives, for you fear that he would be slain ere a battle turned in Luxor's favour. "Impossible" replies Temeril. "I have but twenty warriors and Alazorne is protected by the Ice Empress' magic."

From your pouch you produce the three Fey runes: Moon, Sun and Falcon. Temeril cradles them in his hands and says: "A good omen. Their power may be replenished by the incantations carved upon the magic trunks, but which spell will aid us best? The Moon, symbol of the Fey. The Sun which we so seldom see? Or Falcon bird of power?"

Which do you think? Note your choice and save it for the final instalment of this adventure!

You plod along the tracks of Morkin's horse ever northwards. To the east the sun stains the dark sky red. The north wind howls into your face and brings the first burning flakes of snow. Blizzard! All day long you struggle through the storm. By nightfall you are exhausted and have lost 3 points of Stamina.

The blizzard ends as suddenly as it began and across the frozen land you spy a lone tower. The building reminds you of one of the mysterious structures built by the wise of Midnight. Turn to 3.

27) You slide your dagger from its sheath and adopt a fighting stance. Without turning, the barbarian growls: "So be it! Prepare to die."

Then he springs into a cartwheel and leaps over the campfire. He comes to rest opposite you, testing the weight of his battleaxe in his right hand. You must fight Zorgo to the death. He has a skill of 3 and a stamina of 10. His axe will cause you 2 points of damage if it strikes you. Now roll against your SKILL, then against Zorgo's.

The first character to roll under their skill, strikes first.

• If you survive this battle turn to 5.

• If you are defeated, Zorgo will leave your broken body to the ice vultures.

28) You are unable to dodge the wolf which knocks you to the ground and

saves you. Deduct 2 points of Stamina. You must now fight the wolf to the death. The creature has a Stamina of 9 and a Skill of 3. Its jaws and claws will cause you 1 point of damage.

• If you are slain you become the wolf's next meal.

• If you survive turn to 4.

29) All day long you struggle through the mountains. As night falls you emerge onto the edge of a plain and sight an ancient henge. Turn to 17.

30) If you cast Sun or Falcon you merely succeed in enraging the giant who flings a great boulder at you. This boulder will kill you unless you can dodge it. Roll against your Skill. If you succeed escape to 29. If you fail your quest ends abruptly.

If you cast moon, shadows multiply confusing the giant. You evade him and struggle on through the mountains. Turn to 29.

31) Zargo thrusts his dented helmet even further back on his head and scratches at the stubble on his chin. "No I've seen no lone rider in these parts, but I have seen his tracks. A lone horse, somewhat lame, passed through the forest some days ago. I have also seen a group of the Ice Empress' guards following those tracks."

• Will you now ask Zargo for general news of Icemark? Turn to 34.

• Or thank him for his hospitality and press on along the lone rider's tracks? Turn to 15.

32) You spend a comfortable night sleeping on a bed of hay. Then in the early morning, shortly before dawn, you steal away from the mysterious tower. You are refreshed by your warm sleep but you have only discovered a few apples to eat. Recover 1 point of Stamina. Your way lies north, although the blizzard has erased the tracks of the lone rider. Turn to 5.

33) You awake inside the cave. An old man leans over you and says: "I am sorry to have enchanted you, but we must take precautions in these wild and desolate lands. Come and share a meal by our fire. I am Barzai the Magnificent, a wizard of some repute and this is my companion Bolbog." You turn and see the evil visage of a dwarf dressed in black.

As you eat you tell Barzai of your mission. Instantly he pledges his aid. Turn to 21.

34) "News of this land? Pah! There is no good news." Zorgo spits into the fire then turns to you and exclaims: "In my travels I have seen few others: a shifty sorcerer and a renegade dwarf and a company of strange riders going north. Those riders were not from these lands, they wore metal not fur and bore the banner of a moon and star." Turn to 15.

To be continued next month

The first QL adventures from TALENT!

The Lost Kingdom of ZKOL

Explore the ancient dwelling-place of the Dwarves – where the Wizard guards the last precious secret.

A classic and complex text adventure with hundreds of locations and a huge vocabulary. Set in real-time with traps, tasks, puzzles and mazes – and a special note-pad feature to aid you.

"the quality of the game is superb"
Micro Adventurer

PRICE
£19.95
+ 50p postage and packing

WEST

You are on the track of a notorious gang of bank robbers who have gone to ground near an abandoned mining town deep in Indian territory. Your task – to outwit and outgun the robbers, collect as much loot as possible and piece together clues on how to escape.

A demanding and exciting text adventure for the experienced games-player, using over 200 words and as many phrases. There are over 130 locations to search – not all of them easy to find. Events happen in real-time outside your control – Indians charge, rattle-snakes slither past and robbers appear and shoot at you. How long can you survive?

GOLD RUN II

FOOTBALL FIXTURES

PRNIT OWT

Winter is approaching to the media houses, the time when the population settles at the telly and wallpaper in order to view all those programmes it, hopefully, had the chance to avoid during those fine nights of last summer.

As some small alternative to these eternal repeats, our sets show some original graphic details of perhaps more interesting problems.

PRNIT OWT!

Garbage in garbage out is very much the order of the day whenever the Gremlin Computer Inc. tries its hand at programming. Their latest screen is a typically messed up version of what they would like to have printed — something very well known and simple.

So, can you work out what was going on and tell us which letter or letters should be placed in the empty, middle square?

GOLD RUN

In this little variation on a splendid programme idea, there should be something to suit all puzzling tastes and skill levels.

The idea is simply to make a run from left to right, moving from hexagon to adjacent hexagon, noting the digit you land on each time. The trip must only take in five cells, so straight up or down is out of order, as is going backwards.

For instance, you might start from

the 3 and move to the 5 then 1 then 4 and finish at 6 — which forms the number 35146. Your Simple Starter For 10 Points just to add into a different prog for a mo, is this: how many different five-digit numbers can be formed in runs across this board?

Your Moderate Bonus For 20 Points: when you form each number, add up its digits to give a digital sum — in the number above the digital sum is 3+5+1+4+6=21. Now divide the number by its digital sum: 35146/21.

What you are asked to find is a number which is exactly divisible by its digital sum, for instance, 12345 is divisible by its sum, 15.

You can try some paths out more quickly if you pop your little very basic program into your machine (adapted if necessary) and let your

BLANKETY BLANK

Arnold get the headache by doing the adding and dividing (INPUT the cell number each move you make).

Top Bonus Of 50 Points: is yours if you can write a short program which will set up all the numbers possible from the board and test them out, printing the only two solutions it will find along the way.

How many points will you go for?

FOOTBALL FIXTURES

About ten-to-five on a Saturday afternoon is not the time to have a knot tied in the vidprinter at TV house. Especially on the day when Arnold only needs one more score draw to have the vital three points which will guarantee a dividend. Oddly enough, the missing score can be worked out from the freak fact which has made all the other results an obvious "fix". Can you give Arnold the missing score and tell him if he has cause to celebrate?

Answers on page 176

SOLIDAY ROUTE

The Offaloo Travel Co. have devised this ingenious TV advert to promote their summer tours of South London Sewers. They even offered a plastic mac and a pair of wellies as an incentive to be the lucky first customer.

The problem is they haven't yet found a route for their guide to take sightseers through the tangle of pipes and tubes and which will visit the three main attractions in correct order (1,2,3), before reaching the Balham Tea Room at journey's end.

Can you find a way to arrange their unavoursy tour, given the fact that the path must only take the visitor down any pipe once — for the simple reason that nobody would go down the same pipe ever again?

BLANKETY BLANK

You may have noticed that contestants who win their way through to the Head To Head suffer the severe disadvantage of having to match their brain to that of some celebrity. And as these famous names have shown throughout the previous 30 minutes, they have about as much grey matter as would fill a small egg-cup — and that only if they pooled their resources.

Here you have the advantage that you need only rely on your own mental powers when choosing the answer to our blank clues. Also, the length of each word is shown on the screen. Your problem is that each clue could well be properly linked to several words, so to narrow the range down a lot let us tell you that the first letter of each answer, taken in order, will spell two words — and those words are the name of a very popular and frequent TV series.

Can you fill in the blanks?

Britain's two most popular personal computers, the Commodore 64 and Spectrum are covered from basic to semi-expert in **Which Micro Magazine's Handbooks**.

Author Pete Gerrard, a regular columnist for **Which Micro**, has put together an accurate and practical guide to both computers, at £4.99 per book.

Many programs are included and both 160-page books are spiral bound for easy use and are available in all good bookshops from October 26th or direct through your letterbox by filling in the coupon below.

Computer and Video Games, Britain's most popular computer games monthly, bring you two exciting new books for the Spectrum and Commodore 64.

Each 100-page book contains up to 30 **brand new** games checked and prepared by **Computer and Video Game's** regular contributors.

At £4.99 - the best value on the market at all good bookshops from October 26th, or direct through your letterbox by filling in the coupon below.

COMPETITION

SPOT THE EAR'OLE!

So now you want to strangle us right? Well you will if you spotted the taster on the front cover referring to the competition to win Strangers Adventure games, read the feature and found that there was absolutely no reference to a competition anywhere.

As our friend Neil, the old hippy, would say "Oh Noooooo!"

Picking ourselves up from the floor, we've managed to find the competition and now you really can win

copies of the new Strangers Adventure game for the 48k Spectrum.

Somewhere in this issue we've hidden an Ear — the title of the new Strangers LP is *Aural Quest*, geddit? and a Rat. All you have to do is tell us the page where you found the Ear and the Rat. Easy eh? The first 25 correct entries out of the C&VG memory bin will win a Strangers Adventure. Closing date for the competition is January 16th and normal C&VG rules apply.

C&VG/STRANGERS COMPETITION

I found the Ear on page

PART II SYSTEM 15000 COMPETITION

In the November issue of C&VG, we had 20 copies of Craig Communications' System 15000, 10 for the Spectrum and 10 for the Commodore 64, to give away to the readers who could answer three simple questions plus what they would do with their own modem.

Below are the lucky winners: Gordon Sherran, Ayrshire; Matthew Killingley, Chesterfield; Philip Joseph, London; Martin York, Uttoxeter; Marc Kowalczyk, Plymouth; John McGillivray, Cheshire; Andrew Close, Norfolk; Mike Close, Hull; Richard Lord, Leeds; Marcus Clarke, Cardiff; M Holyroyd, Harrogate; Adam Davies, Dyfed; Steven Izatt, Glasgow; David J Wood, Halifax; David Willis, Bidford on Avon; Chetan Mistry, Enfield; Alan Turner, Whetstone; Craig Smith, Tyne & Wear; Ian Miller, Merseyside; Stephen McLaren, Nottingham.

So, you won a System 15000 in last issue's competition did you? Well now you've qualified for the next part of our great System 15000 competition. All you have to do is play the game — by doing that, you'll be able to answer the questions below.

Get the answers right and you could soon be the proud owner of an Answerphone Modem! We've got five to give away, thanks to our friends at Craig Communications, the people behind System 15000. Want one? Then get cracking!

THE QUESTIONS

1. What is a modem?
2. What type of game is *System 15000*?
3. What is the telephone number for Seastar Travel?
4. Who owns Realco?
5. What is the account access code at Midminster Bank?

SYSTEM 15000 MODEM COMPETITION

My answers are:

SEPTEMBER RESULT

A strip cartoon with no apparent explanation was printed in the Puzzling pages of September's issue.

We asked you to think up an imaginative storyline to go with the cartoon — with software going to the winner.

The story that had the whole team chucking was from Paul Warner who lives in Herts. A selection of games for your Electron is on the way.

Sarah and her mother were going to buy a pet for Sarah's Dad's birthday. They went to the pet shop and after a while they bought a rabbit. Little did they know that the rabbit was in fact a rare African Albino Expanding Rabbit.

Sarah puts the rabbit in a box and carries it around while her Mum finishes her shopping. Just as they finish, Sarah feels the box getting heavier and the box starts to split.

The rabbit had started expanding. Luckily they were outside their local corner shop, so Sarah and her Mum went inside and put the rabbit in a larger box.

Meanwhile, there is a fact, known to only a few, that the rare African Albino Expanding Rabbit is rather partial to a bit of cardboard. Now this rabbit was known for its greediness, so it didn't waste time in devouring the box. By this time Sarah and her Mum were getting worried about the rabbit. So they went to the nearest corner shop which was a super-market.

They found a box which was much larger to put the rabbit in. The rabbit then started nibbling at the box again so Sarah and her Mum ran home.

After all, who wants a rare African Albino Expanding Rabbit in a soggy cardboard box?

COMPETITION

THOMPSON TWINS

Here it is! Or rather here she is. THE winner of our fabulous Spectrum Thompson Twins Adventure game featured on flexi-disc which came with our October issue.

The winner, who found the secret of the Doctor's potion is . . . Alison Wagstaff of Solihull, West Midlands!

Alison will be going to one of the Thompson Twins' British concert dates and will get to meet the band

backstage afterwards. Well done, Alison! You will be hearing from us soon.

Meanwhile our thanks go to the hundreds of C&VG readers who entered the Spectrum Thompson Twins Adventure contest. Don't despair, you could still be one of our ten runners-up.

Now it's owning up time. Commodore 64 owners read on. We experienced considerable problems producing the flexi-record for your computer. It has taken much longer than we expected — but I'm sure you'll understand that we didn't want to send you a sub-standard disc.

You haven't missed out on the chance of seeing the Thompson Twins in action either. Commodore owners now have their own similar prize to go for. That's why we haven't told you what the solution to the TT's Adventure is already. Clever, eh?

So the competition will stay open for Commodore owners only until the end of December. Plenty of time to solve the Adventure and get your answer in to us at C&VG.

HERCULES

In our November issue, we ran a competition to win a new game from Interdisc called *Hercules*. Little did we realise what we were letting ourselves in for! The response was tremendous, but finally we managed to wade through the sacks and come up with 50 winners who will each be receiving one of these games to use on their own Commodore 64. Each winner will be notified in due course. So be watching for the postman — he might be coming to your door!

MITSUBISHI MSX

Just to prove *Computer & Video Games* reaches parts of the world where other computer mags don't, the winner of our fabulous Mitsubishi MSX competition comes from the Middle East! Yes, Samer S. Shuli, from Abu Dhabi in the United Arab Emirates will shortly be getting his hands on a brand new Mitsubishi MLF-50 MSX computer with two joysticks. Well done, Samer!

C&VG'S GOLDEN JOYSTICK AWARDS 1984

Use this form to nominate your favourite games, software house or programmer. No nominations will be accepted unless they come on this form. Send it to *Computer & Video Games*, Golden Joystick Awards, Priory Court, 30-32 Farringdon Lane, London EC1R 3AU.

ATIC ATAC

- 1) **Graham Peters**, Billericay, Essex — 5,629,796
- 2) **Gary Watts**, Bishopstone, Hereford — 1,724,405
- 3) **Carl Thomas**, New Ferry, Wirral — 995,003
- 4) **D J Murray**, Danstone, Uttaxeter — 985,833

PLANETOID

- 1) **Alexander Marco**, Jesmond, Newcastle — 2,565,260
- 2) **Neal Wyde**, Welwyn, Herts — 1,618,500
- 3) **Daniel Poon**, Newpark — 783,475
- 4) **Paul O'Malley**, Romsey, Hants — 684,550
- 5) **Richard Thorpe**, Denham, Bucks — 99,690

PYJAMARAMA

- 1) **David Potter**, St Ives, Cambridgeshire — 11,546
- 2) **David Mitchell**, Woking, Surrey — 7,591
- 3) **Garath Williams**, Leominster, Herefordshire — 6,694
- 4) **G. Minshall**, Carnforth — 6,192
- 5) **Michael Harris**, Weston-super-Mare, Avon — 4,473

JET PAC

- 1) **Andrew Hornsby**, Jones, Rhyl, Clwyd — 25,932,825
- 2) **M. Legge**, Co. Down, Northern Ireland — 24,925,039
- 3) **P. Bullas**, Burnley, Lancs — 18,653,489
- 4) **Gavin Wilby**, Milton Keynes, Bucks — 16,542,102
- 5) **Mike Rudge**, Tintagel, Cornwall — 16,542,102

OUR HALL OF FAME GAMES

Since we relaunched our Hall of Fame with some new games, your hi-scores have been flooding in. Keep it up! If you look below, you'll see we've added a few more new games for you to try your skill at. There's *Starbike* — the space game with a difference from *The Edge* — Acornsoft's *Elite*, a very sophisticated trading game and Micro-Gen's *Pyjamarama* — a sort of Jet Set Willy!

DIAMONDS

Micheal O'Mahony won a £350 diamond for his 5,997 high score on *Diamonds*. English Software's other big game — *Jet Boot Jack* for the Atari computers and 64 — will now replace *Diamonds* in Hell of Fame.

JET PAC

Fly Jet Man around the screen collecting the three sections of his space ship.

DONKEY KONG

The king of climbing games. The ape, the carpenter, and the blonde are now available on Atari, Vic 20, 64, and TI-99/4a from AtariSoft.

MANIC MINER

The tiny 20-second climbing game that introduced *Miner Willy*.

JET SET WILLY

What *Miner Willy* did next. This time there are 60 screens.

THE PYRAMID

The *Pyramid* has Fantasy's unique high score verification system.

ZALAGA

Splendid arcade clone for the BBC.

SABRE WULF

Similar to *Atic Atac* but twice as tough and thrice as pretty.

PSYTRON

Beyond's first big hit for the Spectrum. The *Psytron* is a computerised defence system for the planet Betulia 5.

ELITE

Acornsoft's sophisticated space trading game. Great graphics and action.

STARBIKE

The *Edge* promise a gold BMX bike to the highest scorer on their new game.

JUMP CHALLENGE

Eddie Kild's brand new computer game which features buses, barrels and bikes. Even Eddie found it difficult!

PYJAMARAMA

Wally steps into a nightmare — and into C&VG's Hall of Fame.

ELITE

- 1) **Darren Hickey**, Reigate, Surrey — 428,736
- 2) **C Tsien**, Ilford, Essex — 419,921
- 3) **Michael Auber**, West Drayton, Middx — 311,967
- 4) **Farid Howladar**, Redbridge, Essex — 110,796
- 5) **G Bridgeman**, Chilwell, Nottingham — 18,456

MANIC MINER

- 1) **Paul Rattray**, Kinnoull, Perth — 13,753,289
- 2) **Graham Farthing**, Patching, Brighton — 9,133,137
- 3) **Matthew Hawkins**, Halesowen, West Mids — 8,719,937
- 4) **Paul Knowles**, Bishop Stortford — 7,106,234
- 5) **Phillip Sherlock**, Crewe, Cheshire — 4,973,012

PARSEC

- 1) **Richard Dresner**, Crowborough, E. Sussex — 8,550,700
- 2) **Nicholas Hart**, Hull, North Humberside — 2,528,600
- 3) **Ian Wilson**, Gwynedd, North Wales — 593,000
- 4) **Jonathan Pierce**, Newport, Shropshire — 333,300
- 5) **Keith Jayasekara**, Chelmsford, Essex — 281,500

PSYTRON

- 1) **Clive Richards**, Monkton, Pembrokeshire — 254%
- 2) **Stuart McIntosh**, Bishopsbriggs, Glasgow — 248%
- 3) **Clive Richards**, Monkton, Pembrokeshire — 206%

HALL OF FAME

REWRITE HISTORY THIS WEEKEND!

All action strategy games from SSI-

-the world's No.1 war game company

It's just here is your chance to see how you shape up as a General in a real battle! The pages of history record the triumphs and failures as Eisenhower, Montgomery, Rommel and Von Rundstedt battled in Compe and North Africa. But with a clever thinking strategist like yourself in command perhaps the historians would have had a different story to write!

U.S. Gold is proud to present four of the best strategy games by Strategic Simulations Incorporated:

KNIGHTS OF THE DESERT pitches the British Forces of Montgomery against the might of Rommel and his Panzer Divisions in the classic North African campaign of 1941.

BATTLE FOR NORMANDY commences on 'D-Day' June 6th 1944 and relives the Allied Forces attempt to smash Hitler's Atlantic Wall.

TIGERS IN THE SNOW reconstructs the legendary Battle of the Bulge as in December 1944 the Panzer Divisions of Von Rundstedt try one last gamble in a desperate attempt to halt Eisenhower's advancing Allied lines.

Who will be the victor and who the vanquished?

Only you have the answers!

And if you're looking for strategy with arcade action then **COMBAT LEADER** will test all your wits, depth of thought and reflexes in this wargame of battle challenges!

BEEP FOR THE 64

Keyboard beep routines seem to be very popular with everyone. These routines make your micro beep each time you press a key, which saves you having to stare at the screen while you type in a program.

This month, A G MacMaster from the West Midlands gives us this routine to do the job on a Commodore 64. Load the program and run it. It will then erase itself (so make sure you save it before you run it!) and the machine will beep when you press any key.

ANOTHER TWO COMPILERS

Yes, it's time once again for our monthly mention of *Blue Thunder*. You'll remember from last month's episode that *Blue Thunder*, a game for the Spectrum by Richard Wilcox software, was written with a compiler and a copy of this compiler was hidden on some early copies of the game.

Well, I've heard of another two games which were written with compilers and, because of the way a compiler works, it has to be on the cassette along with the final program.

The games in question are *Frank N Stein* by PSS and *War of the Worlds* by CRL.

Frank N Stein uses Mcode 2, also by PSS and one of the best known compilers. Type CLEAR 25000 to load the main code for the program. Type SAVE "COMPILER" CODE 60000,5536 and you should have a compiler on tape. To load it, CLEAR 59999 and LOAD "" CODE.

War of the Worlds also uses a

compiler but I'm not sure which one. Wind your tape to the start of the 8th program block (WOW MC) and CLEAR 40000. Then POKE 23613, PEEK(23730-5):LOAD "" CODE.

Then enter your Basic program and RAND USR 60000 to compile it. RAND USR 40000 will run the compiled program.

THE MISSING LINES

Cosmic Digger and Robo-1 must have been very popular games, judging by the amount of phone calls we received about these two listings from November's issue.

Unfortunately, we missed the end of each program. We've managed to rescue the offending lines from the printer, and all should be revealed next month.

However, if you can't wait, send me your name and address and I'll post a copy off to you. Don't forget to say which one you want.

MISPRINTS

The Amstrad CPC 464 wallet chart from a couple of issues ago lost a word on the sound category. The machine has, as you'd probably guessed, the same sound chip as the BBC micro. If you read the wallet chart and wondered where the words had gone, all should now be clear.

And while we're at it, that headline on last month's Bug Hunter page was supposed to say "a definite red flag". Seems like I was trying to fit too many words into too small a space.

WRONG MACHINE

Apologies to all Commodore 64 owners who tried typing in Boxer from December's issue. Owing to an error on our part, the game is actually for the Vic and not the 64. And while we're at it, apologies to all those Vic readers who think they now have a free Boxer game. It's actually called Ghosty!

Sorry about that. But don't be too disappointed. Wait until you see all those Commodore listings in my free book of games next month!

MUSIC FROM ICELAND

Karl Thoroddsen writes all the way from Iceland with a routine to make explosion sound effects on a Beeb:

```
10 ENVELOPE 1, 10, -6.0,0.30,0.0,0,0,0,0
20 SOUND 11,1,1.60: SOUND 10,15.7,60
```

THAT'S CHEATING

Having trouble with Ocean's *Decathlon* for the Spectrum? Wanna know how to get past the high jump? Easy, just go under it!

Set the bar to something over 2.35 metres. Keep your finger on the button and jump under the bar. You'll still qualify.

Thanks to Michael Henderson for that one.

DA BUG IN MUGSY

A bug seems to be alive and well and living in my copy of Melbourne House's *Mugsy* for the Spectrum.

When a contract is put out on you, enter a negative amount. Then, when you lose the money, the negative amount will be removed from your total. This means that it will actually be added!

MSX BUG

Our Major Tom listing for the MSX machines in November's issue suffered a missing comma in line 450. The line should read:

```
450 DRAW "C7BM=XF:,180DS"
```

You can write to Bug Hunter at Priory Court. Or call during the day on 01-251 6222. If you uncover a bug during one of those all-night programming sessions, don't save it till morning. Just call 01-251 5633 and a friendly voice will say "this is a recording, please leave your message after the beep." Well, you don't expect me to work all night, do you?

BOOK OF GAMES

Will you please welcome back the amazing C&VG Book of Games! Yes, next month we bring you the son of the son of the son of the Book of Games, the latest in a long line of great add-ons to your favourite games magazine. These supplements are legendary among games fans everywhere, so you'll have to be quick off the mark to grab a copy of C&VG off the shelves before they all disappear. The Book of Games will have 48 pages crammed full of top game listings for all the top micros — Spectrum, Commodore, BBC, Atari, Texas and more. We've raided our software files to bring you the pick of our readers' games. Demand will be high so place an order now.

COLUMN

Mike Singleton's Fifth Column, C&VG's regular feature of strategy and war-games, begins a new play-by-mail game, called *Seidon's Game* — that's if Mike has finished programming *Doomdark's Revenge* in time! Whatever happens, war-gamers and strategy fans can't afford to miss Mike's authoritative opinions of the scene in 5th Column next issue.

PROFESSOR'S TIPS TAKE £5!

Since Professor Video began work on his games tutorials, many of his loyal students have been flooding the C&VG office with hints and tips for our Prof to add to his notes. Next issue sees the start of the

Prof's very own readers' games tips page. YOU could win yourself a crisp blue five pound note if your suggestions for beating your favourite game are chosen as the Prof's Top Tip. In fact you may already qualify for the Prof's fiver — check out the February issue of C&VG to find out!

GHOSTBUSTERS

Ghostbusters, the movie about a bunch of ghost-hunters, could become the most successful film of the decade. The game of the film, reviewed this issue, could become the best selling computer game of the year. In any event YOU could win a copy of the brand new *Ghostbusters* game if you haunt your local newsagent and spirit a copy of *Computer & Video Games* out of his hands. We've got 50 copies of the game — 25 for the Commodore 64, 25 for the Spectrum — up for grabs in February. Don't miss out!

DOOMDARK PART III

Will Shareth the Heartstealer get her just reward for kidnapping poor old Markin? Will the forces of good defeat the forces of evil? Will we ever say what the prize is for solving our Fighting Fantasy epic role-playing game based on the soon to be released sequel to the *Lords of Midnight* — *Doomdark's Revenge*? Find out in February.

COMPETITION RESULTS

KONAMI MSX

Hundreds of you rushed off to enter our Konami MSX competition and we've just managed to finish opening your entries in time for this issue! We asked you to pick out four Konami games from a list of 15 arcade classics. You could have chosen *Time Pilot*, *Super Cobra*, *Hyper Sports*, *Pooyan*, *Track & Field* or *Juno Fast*. 30 first prize winners will get a Konami games cartridge for their MSX machine and 50 runners-up will get a giant *Hyper Sports* colour poster for their bedroom walls. I'm sorry there's not enough space to list all your names — but well done anyway and watch your letterbox for an interesting package!

Among all the MSX hardware and software we were giving away last issue, we also had some bookware. Ten copies of Tom Sato's definitive book on MSX, published by Melbourne house, were on offer if you could answer two simple questions. The ten people who got it all right were: Michael Jackson, Southport, Merseyside; Mark Chamberlain, Portsmouth, Hants; Paul Scrivens, BFPO 16; David Walters, Co. Meath, Ireland; Paul Serbert, Harrogate, N. Yorks; H. Kaye, Leeds; Stuart Bray, St Albans, Herts; Neil Parker, Highbridge, Somerset; Tim Marshall, Hartley Wintney, Hampshire; Stephen Marsden, Redcar, Cleveland.

MSX BOOKS

PUZZLING RESULTS

Blankey Blank
Star, Car, Raquet, Egg, Energy, Number, Turning, Engine, Stamp, Torture. Which spells SCREEN TEST.

Football Fixtures
Arnold should get the drinks in — the score was Man Utd 2 Everton 2. Each team scored the number of letters in its printed name divided by 3, ignoring the remainder. If you missed it, read the test and note the whopping clue about score draws!

Gold Run
1. Forty different routes.
2. The only two numbers which work are 27956 and 35238.

Punit owl
The missing letters are FV. Each square has a number from 1 to 9 printed as a word — but the vowels are missed out!

KoalaPad™ TouchTablet

JUST PICTURE IT!

JUST PICTURE IT - BEING ABLE TO DRAW YOUR OWN HIGH RESOLUTION GRAPHIC DESIGNS ON YOUR COMPUTER SCREEN WITHOUT HAVING TO WRITE A PROGRAM ...!

Well, now you can - with the amazing Koala Pad from Audiogenic!

The Koala Pad touch tablet provides the direct link between you and your screen! It's compatible with Commodore 64 and lets you paint directly onto the screen with a selection of brush sizes and a choice of 16 colours and 16 shades from your software palette.

But that's just the beginning - because every Koala Pad package includes the incredible Koala Painter software which makes it child's play to:

- Fill outlines with a colour!
- Draw straight lines!
- Make frames!
- Draw circles!
- Plot radians from a point!
- Move objects around!
- Copy shapes!
- Create mirror images!
- Zoom in on an area!
- Swap shapes between two pictures!
- Save your pictures to disk or tape!

The program is controlled entirely from the tablet by moving a cursor arrow around to the different menu option. An optional Programmers Guide is also available to tell you how to incorporate Koala Pad pictures into your own programs.

Now you don't have to be an experienced programmer to produce real high resolution graphics on your computer - the Koala Pad from Audiogenic makes it as easy as a pencil and paper. Just picture it!

Available with Cassette or Disk software for the Commodore 64
From all good computer shops - or direct from Audiogenic - just fill in the coupon!

Please send me (QTY) Koala Pad Disk/Cassette* I enclose cheque/P.O. for
